Established and renowned theologians and philosophers such as Kevin Hart, Eduardo Mendieta and Clemens Sedmak, as well as upcoming and talented young academics, look at peace and non-violence through the lens of recent scholarly advances on the subject achieved in the fields of theology, philosophy, political theory and environmentalism.

Cloneliness Michael O'Sullivan, 2019-09-19 Recent posthuman philosophies, human-computer interface studies and technology-inspired biopolitical discourses and practices are reinventing and reimagining loneliness in different communities. *Cloneliness: The Reproduction of Loneliness* takes a cross-cultural approach to loneliness by examining 20th-century artistic expressions and examinations of loneliness in the context of more recent global expressions grounded in social networks, virtual reality, the biopolitical commons, academic credentialization and such practices as hikikomori. Newer forms of loneliness pushed by the algorithms of biopolitical capitalism result in what this book calls cloneliness. Michael O'Sullivan plots the transformation in loneliness in literature and philosophy in readings that take us from Henry James and such classic works as Frank O'Connor's *The Lonely Voice* and Richard Yates's *Eleven Kinds of Loneliness* to more recent expressions in such writers as David Foster Wallace, Yiyun Li and Sayaka Murata. Michael O'Sullivan argues that cloneliness as an institutional practice of reproduction in society normalizes and reproduces loneliness in order to create subjects who are more willing to accept ideologies of competition, extreme individualism and the stresses of being interconnected loners.

Car Safety Wars Michael R. Lemov, 2015-03-19 *Car Safety Wars* is a gripping history of the hundred year struggle to improve the safety of American automobiles and save lives on the highways Described as the equivalent of war by the Supreme Court the battle involved the automobile industry unsung and long forgotten safety heroes at least six US Presidents a reluctant Congress new auto technologies and most of all the mindset of the American public would they demand and be willing to pay for safer

cars The Car Safety Wars were at first won by consumers and safety advocates The major victory was the enactment in 1966 of a ground breaking federal safety law The safety act was pushed through Congress over the bitter objections of car manufacturers by a major scandal involving General Motors its private detectives Ralph Nader and a gutty cigar chomping old politician The act is a success story for government safety regulation It has cut highway death and injury rates by over seventy percent in the years since its enactment saving more than two million lives and billions of taxpayer dollars But the car safety wars have never ended GM has recently been charged with covering up deadly defects resulting in multiple ignition switch shut offs Toyota has been fined for not reporting fatal unintended acceleration in many models Honda and other companies have for years sold cars incorporating defective air bags These current events suggesting a failure of safety regulation may serve to warn us that safety laws and agencies created with good intentions can be corrupted and strangled over time This book suggests ways to avoid this result but shows that safer cars and highways are a hard road to travel We are only part of the way home
