**Problems of Religious Luck** Guy Axtell,2020-07-07 To speak of being religious lucky certainly sounds odd But then so does My faith holds value in God s plan while yours does not This book argues that these two concerns with the concept of religious luck and with asymmetric or sharply differential ascriptions of religious value are inextricably connected It argues that religious luck attributions can profitably be studied from a number of directions not just theological but also social scientific and philosophical There is a strong tendency among adherents of different faith traditions to invoke asymmetric explanations of the religious value or

salvific status of the home religion vis vis all others Attributions of good bad religious luck and exclusivist dismissal of the significance of religious disagreement are the central phenomena that the book studies Part I lays out a taxonomy of kinds of religious luck a taxonomy that draws upon but extends work on moral and epistemic luck It asks What is going on when persons theologies or purported revelations ascribe various kinds of religiously relevant traits to insiders and outsiders of a faith tradition in sharply asymmetric fashion I am saved but you are lost My religion is holy but yours is idolatrous My faith tradition is true and valued by God but yours is false and valueless Part II further develops the theory introduced in Part I pushing forward both the descriptive explanatory and normative sides of what the author terms his inductive risk account Firstly the concept of inductive risk is shown to contribute to the needed field of comparative fundamentalism by suggesting new psychological markers of fundamentalist orientation The second side of what is termed an inductive risk account is concerned with the epistemology of religious belief but more especially with an account of the limits of reasonable religious disagreement Problems of inductively risky modes of belief formation problematize claims to religion specific knowledge But the inductive risk account does not aim to set religion apart or to challenge the reasonableness of religious belief tout court Rather the burden of the argument is to challenge the reasonableness of attitudes of religious exclusivism and to demotivate the polemical apologetics that exclusivists practice and hope to normalize

**Beyond the Policy Cycle** HK

Colebatch,2020-07-29 It is common and comforting to see public policy as the result of careful craft work by expert officials who recognise a problem identify and evaluate possible responses and choose the most appropriate strategy the policy cycle The reality is more complex and challenging Many hands are involved in policy making not all of them official they are not all addressing the same problem they have different ideas about what would be a good answer and the process is rarely brought to a neat close by a clear decision The development of policy can resemble firefighting with players rushing to react to demands for action in areas that are already in crisis or it can be a less frenetic process of weaving as they search for an outcome which reflects the concerns of all the stakeholders Effective participation in the policy process calls for a clear understanding of this complexity and ambiguity Beyond the Policy Cycle sets policy in this wider context It recognises that participants in the process are drawn from both government and diverse areas outside government and looks not at a model process but rather at how the game is played how issues rise to prominence who is actually doing the work and exactly what it is that they are doing With detailed Australian case studies and examining the implications of recent trends in policy such as the outsourcing of service provision Beyond the Policy Cycle offers students and practitioners a critical and engaged look at the activity of policy that reflects the reality of the policy experience
