Risk Rules Marvin Zonis, Dan Lefkowitz, Sam Wilkin, Joseph Yackley, 2011-04-01 Four political analysts explore the importance of local issues to global business and politics in this fully updated edition of *The Kimchi Matters* Today's focus on globalization has obscured the fact that political stability and economic growth are determined at the local level Investors and foreign policymakers set themselves up for failure when they don't consider the unique local dynamics of a particular country or region This is equally true for companies venturing abroad and for politicians facing geopolitical challenges In their 2003 book *The Kimchi Matters* the authors demonstrated how globalization made it more important than ever to understand the political economies of distant countries Now they have returned to that acclaimed work with updated accounts of situations around the world including in Russia India China Argentina and Brazil and refine the principles they laid out in the first edition

Asian politics comparative foreign policy and international relations as well as professionals interested in China's changing place in the global system *Assessing China's Naval Power* Sarah Kirchberger, 2015-06-23 This book analyzes the rise of China's naval power and its possible strategic consequences from a wide variety of perspectives technological economic and geostrategic while employing a historical comparative approach throughout Since naval development requires huge financial resources and mostly takes place within the context of transnational industrial partnerships this study also consciously adopts an industry perspective The systemic problems involved in warship production and the associated material financial technological and political requirements currently remain overlooked aspects in the case of China Drawing on first hand working experience in the naval shipbuilding industry the author provides transparent criteria for the evaluation of different naval technologies strategic value which other researchers can draw upon as a basis for further research in such diverse fields as International Security Studies Naval Warfare Studies Chinese Studies and International Relations **Chinese Law:**

Context and Transformation Jianfu Chen, 2015-12-04 China has changed and the continuing changes have not just been about economic development Among the many transformations there has been another quiet peaceful and largely successful but far from perfect revolution in the area of law whose deficiencies have been more often mercilessly examined and documented than have its historical achievements and significance This legal revolution is the subject matter of the present book Like the previous edition in 2008 it examines the historical and politico economic context in which Chinese law has developed and transformed focusing on the underlying factors and justifications for the changes It attempts to sketch the main trends in legal modernisation in China offering an outline of the principal features of contemporary Chinese law and a clearer understanding of its nature from a developmental perspective It provides comprehensive coverage of topics legal culture and modern law reform constitutional law legal institutions law making administrative law criminal law criminal procedure law civil law property family law contracts torts law on business entities securities bankruptcy intellectual property law on foreign investment and trade Chinese investment overseas dispute settlement and implementation of law Fully revised updated and considerably expanded this edition of *Chinese Law Context and Transformation* is a valuable and important resource for researchers policy makers and teachers alike **Who's Afraid of China?** Doctor Michael

Barr, 2012-06-14 If China suddenly democratised would it cease being labelled as a threat This provocative book argues that fears of China often say as much about those who hold them as they do about the rising power itself It focuses not on the usual trope of economic and military might but on China's growing cultural influence and the connections between China's domestic politics and its attempts to brand itself internationally Using examples from film education media politics and art *Who's Afraid of China* is both an introduction to Chinese soft power and a critical analysis of international reaction to it It examines how the West's own past hopes and fears shape the way it thinks about and engages with China and argues that the rising power touches a nerve in the Western psyche presenting a fundamental challenge to ideas about modernity history

and international relations *The Courage of Hopelessness* Slavoj Žižek, 2017-05-11 In these troubled times even the most pessimistic diagnosis of our future ends with an uplifting hint that things might not be as bad as all that that there is light at the end of the tunnel Yet argues Slavoj i ek it is only when we have admitted to ourselves that our situation is completely hopeless that the light at the end of the tunnel is in fact the headlight of a train approaching us from the opposite direction that fundamental change can be brought about Surveying the various challenges in the world today from mass migration and geopolitical tensions to terrorism the explosion of rightist populism and the emergence of new radical politics all of which in their own way express the impasses of global capitalism i ek explores whether there still remains the possibility for genuine change Today he proposes the only true question is or should be this do we endorse the predominant acceptance of capitalism as a fact of human nature or does today s capitalism contain strong enough antagonisms to prevent its infinite reproduction Can we he asks move beyond the failure of socialism and beyond the current wave of populist rage and initiate radical change before the train hits Entrepreneurship in the Global Economy Henry Kressel, Thomas V. Lento, 2012-07-19 Entrepreneurs have long been drivers of innovation in developed countries They start companies and create new industries that keep economies strong and prosperous Today however in developing nations such as China state controlled economies are building robust industries at stunning speed and siphoning off jobs from the West How can entrepreneurs function in the face of this challenge Can they continue to create economic value in a globalized business environment This book addresses the crucial issue of state planning vs free enterprise and examines specific problems surrounding entrepreneurship in the global economy through nine case histories of entrepreneurial companies It also looks at how and why government gets involved in economic growth and how entrepreneurs contribute to economic value Based on this analysis the authors argue that companies can succeed even in controlled economies by understanding the customs and policies of countries where they do business **Rivalry And Cooperation In The Asia-Pacific: The Dynamics Of A Region In Transition (In 2 Volumes)** Mark Beeson, 2019-09-23 Rivalry and Cooperation in the Asia Pacific provides a comprehensive and accessible introduction to the most important strategic and economic region in the world Asia Pacific is a region that is undergoing a major transformation largely as a consequence of the rise of China and its growing rivalry with the United States Whatever happens in the Asia Pacific will profoundly influence global events not just regional ones Looking ahead the region s future direction and even its name is contested and uncertain This two volume reference work by one of the world s leading analysts of regional affairs places these events in historical context and considers what they may mean for future political economic and strategic relations By focusing on the United States China and the region s most significant middle powers the book explains why and how the Asia Pacific has become the fulcrum of international events **Don't Wait for the Next War** Wesley K. Clark, 2014-09-16 With the end of the Cold War came not the end of history but the end of America s sense of its strategic purpose in the world Then after a decade of drift the US was violently dragged back into international conflict Its

armed forces responded magnificently but its leaders objectives were substantially flawed We fought the wrong war twice for reasons that were opaque and few American citizens understood the cause for which their sons and daughters were fighting and dying War is a poor substitute for strategic vision and decisions made in the heat of imminent conflict are often limited by the emotions of the moment In Don't Wait for the Next War Wesley K Clark a retired four star general of the US army and former Democratic candidate for president presents a compelling argument for continued American global leadership and the basis on which it can succeed a new American strategy America needs both new power and deeper perspective The platform for American leadership is to use America's energy resources to spark sustainable economic growth building new strength to deal with pressing domestic issues like the deficit as well as the longer term challenges to US security terrorism cyber threats the next financial crisis China's rising power and climate change Such a strategy is not only achievable but essential and it is urgently needed This is the true test of American leadership for the next two decades but it must start now so America has the power and vision to deal with the acute crises that will inevitably come in the Mideast Europe or Asia

China and the WTO Petros C. Mavroidis, Andre Sapir, 2025-06-17 An examination of China's participation in the World Trade Organization the conflicts it has caused and how WTO reforms could ease them China's accession to the World Trade Organization WTO in 2001 was rightly hailed as a huge step forward in international cooperation However China's participation in the WTO has been anything but smooth with China alienating some of its trading partners particularly the United States The mismatch between the WTO framework and China's economic model has undermined the WTO's ability to mitigate tensions arising from China's size and rapid growth What has to change China and the WTO demonstrates that unilateral pressure by the United States and others is not the answer Instead Petros Mavroidis and Andr Sapir show that if the WTO enacts judicious reforms it could induce China's cooperation leading to a renewed confidence in the WTO system The WTO and its predecessor the General Agreement on Tariffs and Trade are predicated on liberal domestic policies They managed the previous accessions of socialist countries and big trading nations but none were as large or powerful as China Mavroidis and Sapir contend that for the WTO to function smoothly and accommodate China's unique geopolitical position it needs to translate some of its implicit principles into explicit treaty language To make their point they focus on two core complaints that Chinese state owned enterprises SOEs benefit from unfair trade advantages and that domestic companies private as well as SOEs impose forced technology transfer on foreign companies as a condition for accessing the Chinese market and they lay out specific proposals for WTO reforms In an age of global trade disputes China and the WTO offers a timely exploration of unprecedented challenges to the current multilateral system and fresh ideas for lasting solutions
