Exploring the Philosophy of Death and Dying Travis Timmerman, Michael Cholbi, 2020-12-30 Exploring the Philosophy of Death and Dying: Classical and Contemporary Perspectives is the first book to offer students the full breadth of philosophical issues that are raised by the end of life. Included are many of the essential voices that have contributed to the philosophy of death and dying throughout history and in contemporary research. The 38 chapters in its nine sections contain classic texts by authors such as Epicurus, Hume, Nietzsche, and Schopenhauer and new short argumentative essays specially commissioned for this volume by world-leading contemporary experts. Exploring the Philosophy of Death and Dying introduces students to both theoretical issues: whether we can survive death, whether death is truly bad for us, whether immortality would be desirable, etc., and urgent practical issues: the ethics of suicide, the value of grief, the appropriate medical criteria for declaring death, etc., raised by human mortality, enabling instructors to adapt it to a wide array of institutions and student audiences. As a pedagogical benefit, PowerPoints, discussion questions, and test questions for each chapter are included as online ancillary materials.

Conquering the Spirit of Death Becky Dvorak, 2019-11-19 Take Hold of Resurrection Life. The devil prowls around like a lion seeking to steal, kill, and destroy. The Coming Collapse of China Gordon G. Chang, 2001-09-15 China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere. Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism. Chang writes, "With its impending World Trade Organization membership for the first time, China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse." Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.
