The New Economic History of the Railways (Routledge Revivals) Patrick O'Brien, 2014-11-13 The book first published in 1977 contrasts new and older approaches to the history of transport and outlines a critical exposition of the methods used to quantify the contribution of railways to economic growth by means of counterfactual speculation and the measurement of social savings The author also outlines and appraises an alternative measure of the impact of railways namely the social rate of return on capital invested in railways The final chapters are concerned with the effects on growth generated by the construction and diffusion of railways through expenditure on labour capital goods and industrial inputs and through their effects on the integration of markets and patterns of location *An Economic History of Liberal Italy (Routledge Revivals)*

Gianni Toniolo, 2014-10-14 This book first published in 1990 examines Italy's economic history from its Unification in 1850 to the end of the First World War Particular attention is paid to the extent to which Italy exhibits the features of Keynes's model of modern economic growth *An Economic History of Liberal Italy* begins with a quantitative assessment of Italy's long term growth in this period All of the main relevant variables including production consumption investment foreign trade government spending and welfare are discussed The book proceeds through a chronological account of the developments of the economy during this period and concludes with a critical survey of the relevant historiography Throughout the book emphasis is given to structural changes to developments in the main industries to the relations between different sectors of the economy and to economic policies This book is ideal for those studying economics of Italian history The New

Economic History of the Railways Patrick Karl O'Brien, 1977-01-01 **The Economics of the Industrial Revolution (Routledge Revivals)** Joel Mokyr, 2018-07-18 In recent years scholars from a variety of disciplines have addressed many perplexing questions about the Industrial Revolution in all its aspects Understandably economics has become the focal point for these efforts as professional economists have sought to resolve some of the controversies surrounding this topic First published in 1985 this collection contains ten key essays written by leading economists on the subject of the Industrial Revolution Among the questions discussed are the causes for the pre-eminence of Britain the roles of the inputs for growth capital labor technical progress the importance of demand factors the relation between agricultural progress and the Industrial Revolution and the standard of living debate The essays demonstrate that the application of fresh viewpoints to the literature has given us a considerable new body of data at our disposal making it possible to test commonly held hypotheses In addition this new data has enabled economists to apply a more rigorous logic to the thinking about the Industrial Revolution thus sharpening many issues heretofore blurred by slipshod methodology and internal inconsistencies Man and the Social Sciences (Routledge Revivals) William Alexander Robson, 2014-02-04 One of the most significant movements in the world of learning in the twentieth century was the rise and development of the social sciences However few attempts have been made to see how far social scientists have travelled on the road to studying and understanding human society First

published in 1972 the lectures reprinted in this book aim to trace the development of the social sciences during the twentieth century and to show the role of the London School of Economics and Political Science in this development since it was founded in 1895 Each of the very distinguished lecturers was asked to take the larger view to be critical where necessary to treat his subject in the context of the world of learning The result is a survey of exceptional interest in which the growth of the social sciences is analysed from a number of contrasting viewpoints each of which ranges widely and often with provocative brilliance over themes that are of general concern The introduction by Professor W A Robson which was not part of the original lecture series is in itself a critical assessment of the field that will be read with close attention

Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive

understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history
