## **The Obsidian Collection:**

The Technology of Maya Civilization Zachary X. Hruby, Geoffrey E. Braswell, Oswaldo Chinchilla Mazariegos, 2014-10-14  
The ancient Maya shaped their world with stone tools. Lithic artifacts helped create the cityscape and were central to warfare and hunting craft activities, cooking, and ritual performance. The Technology of Maya Civilization examines Maya lithic artefacts made of chert, obsidian, silicified limestone, and jade to explore the relationship between ancient civilizations and natural resources. The volume presents case studies of archaeological sites in Guatemala, Mexico, Belize, and Honduras. The analysis draws on innovative anthropological theory to argue that stone artefacts were not merely cultural products but tools that reproduced, modified, and created the fabric of society.

**The Archaeology and History of Pueblo San Marcos** Ann F. Ramenofsky, Kari L. Schleher, 2017-11-15  
San Marcos, one of the largest late prehistoric Pueblo settlements along the Rio Grande, was a significant social, political, and economic hub both before Spanish colonization and through the Pueblo Revolt of 1680. This volume provides the definitive record of a decade of archaeological investigations at San Marcos, ancestral home to Kewa, formerly Santo Domingo, and Cochiti descendants. The contributors address archaeological and historical background, artifact analysis, and population history. They explore possible changes in Pueblo social organization, examine population changes during the occupation, and delineate aspects of Pueblo-Spanish interaction that occur with Spaniards' intrusion into the colony and, especially, the Galisteo Basin. Highlights include historical context, in-depth consideration of archaeological field and laboratory methods, compositional and stylistic analyses of the famed glaze-paint ceramics, analysis of flaked stone that includes obsidian hydration dating, and discussion of the beginnings of colonial metallurgy and protohistoric Pueblo population change.

Obsidian Across the Americas Gary M. Feinman, Danielle J. Riebe, 2022-12-08  
This volume draws attention to recent obsidian studies in the Americas and acts as a reference for archaeologists and scholars interested in material culture and exchange. Moreover, it provides a wide range of case studies in obsidian characterization, material application, and theoretical interpretations in the Americas.

Lost Laborers in Colonial California Stephen W. Silliman, 2008-10-01  
Native Americans who populated the various ranchos of Mexican California as laborers are people frequently lost to history. The rancho period was a critical time for California Indians, as many were drawn into labor pools for the flourishing ranchos following the 1834 dismantlement of the mission system, but they are practically absent from the documentary record and from popular histories. This study focuses on Rancho Petaluma, north of San Francisco Bay, a large livestock, agricultural, and manufacturing operation on which several hundred, perhaps as many as two thousand, Native Americans worked as field hands, cowboys, artisans, cooks, and servants. One of the largest ranchos in the region, it was owned from 1834 to 1857 by Mariano Guadalupe Vallejo, one of the most prominent political figures of Mexican California. While historians have studied Vallejo, few have considered the Native Americans he controlled, so we know little of what their lives were like or how they adjusted to the colonial labor regime. Because Vallejo's Petaluma Adobe is now a state historic park and

one of the most well protected rancho sites in California this site offers unparalleled opportunities to investigate nineteenth century rancho life via archaeology Using the Vallejo rancho as a case study Stephen Silliman examines this California rancho with a particular eye toward Native American participation Through the archaeological record tools and implements containers beads bone and shell artifacts food remains he reconstructs the daily practices of Native peoples at Rancho Petaluma and the labor relations that structured indigenous participation in and experience of rancho life This research enables him to expose the multi ethnic nature of colonialism counterbalancing popular misconceptions of Native Americans as either non participants in the ranchos or passive workers with little to contribute to history *Lost Laborers in Colonial California* draws on archaeological data material studies and archival research and meshes them with theoretical issues of labor gender and social practice to examine not only how colonial worlds controlled indigenous peoples and practices but also how Native Americans lived through and often resisted those impositions The book fills a gap in the regional archaeological and historical literature as it makes a unique contribution to colonial and contact period studies in the Spanish Mexican borderlands and beyond Fanning the Sacred Flame Brian D. Western travel and collecting classical antiquities in the nineteenth century informed European understandings of Greece s past and present and enriched private collections and museums Travel and collecting have typically been studied separately by literary scholars historians of archaeology and historians of the Ottoman Empire and modern Greece Similarly publications have largely prioritised evidence from and about elite social groups This book breaks new ground through its interdisciplinary approach its insistence on the interweaving of the phenomena of travel and collecting and its emphasis on marginalised perspectives Contributors drawn from art history classics history of architecture Ottoman history and modern Greek history foreground diversity and small scale engagements with the landscape and material past of Ottoman Greece The book explores the

perspectives of both foreign travellers and local inhabitants through case studies keeping a sharp focus on ethnicity and social status Diaries visual art and rich archival material are analysed often from a novel perspective to give voice to a range of people including English servants Albanian peasants an illiterate Greek fighter and the Ottoman Sultan The result is a micro cultural history of travel and classical collecting which expands existing narratives As such it changes the simplistic dichotomy between collecting as pillaging or saving and nuances the important current debate surrounding repatriation Travel and Classical Antiquities in Nineteenth Century Ottoman Greece addresses scholars in the areas of classical reception studies classical archaeology material culture studies nineteenth century studies Ottoman studies and modern Greek studies It will also appeal to a broader audience of people interested in travel writing the history of archaeology and the history of Greece *Prehistoric research in southeastern Anatolia* Halet Çambel, Robert John Braidwood, 1980 **Three Rivers**
