independent of the actions of great men and other individual actors This comprehensive volume brings together over two decades of the authors research on culture indicators Key findings include the identification of two long term cultural cycles in the United States and Great Britain one is related to party realignments the other to long term economic fluctuations In addition the authors demonstrate how culture provides the themes that political parties use to interpret economic conditions in their appeal for votes Other results show that organizational cultures move in opposite directions from those in the culture of the larger society The book also includes detailed discussions of both the methodology used to analyse text content and related metatheoretical issues in the study of cultural dynamics

Coen Teulings, Joop Hartog, 1998-09-17 The authors present important research showing that corporatist institutions generate smaller non competitive wage differentials than a decentralized system A theoretical explanation is developed based on the hold up problem in investments arguing that corporatist institutions solve the problem by specifying ex ante nominal contracts that remove the necessity of ex post bargaining over the surplus of an employment relationship The authors also argue that such institutions allow sufficient flexibility to accommodate aggregate shocks even more so than decentralized systems Corporatism or Competition is the first book to
