Galaxies: A Very Short Introduction John Gribbin, 2008-03-27 In this fascinating Very Short Introduction popular science writer John Gribben tells the story of our growing understanding of galaxies from the days before Galileo to our present day observations of our many hundreds of millions of galactic neighbors Not only are galaxies fascinating astronomical structures in themselves but their study has revealed much of what we know today about the cosmos providing a window on the Big Bang and the origins of the Universe Gribben looks at our own Milky Way Galaxy in detail from the different kinds of stars that are born within it to the origins of its magnificent spiral structure Perhaps most

interesting Gribben describes the many exciting discoveries have been made about our own galaxy and about those beyond how a supermassive black hole lurks at the center of every galaxy how enormous forces are released when galaxies collide how distant galaxies provide a window on the early Universe and how the formation of young galaxies shed needed light on the mysteries of Cold Dark Matter John Gribbin is one of the best known current popular science writers His many books include the acclaimed *The Universe A Biography* *In Search of Schrodinger's Cat* and *Science A History* He has written for many newspapers and regularly contributes to radio and television documentaries and debates and also writes science fiction novels He formerly worked for *Nature* and *New Scientist* and is presently a Visiting Fellow in Astronomy at the University of Sussex 1 *A Very Short Introduction* 2 *The Great Debate* 3 *Our Island* 4 *The Expanding Universe* 5 *Across the Universe* 6 *The Origin of Galaxies* 7 *The Universe at Large* References Further Reading Index [Russian Literature: A Very Short Introduction](#)

[Catriona Kelly, 2001-08-23](#) This text explores the place and importance of literature of all sorts in Russian culture and aims to answer the questions How and when did a Russian national literature come into being and What shaped its creation *What the Koran Really Says* Ibn Warraq, 2010-10-29 This excellent collection of critical commentaries on the Koran brings together outstanding articles by noted scholars from the beginning of the 20th century to recent times These important studies as well as the editor's own lengthy introduction show that little about the text of the Koran can be taken at face value Among the fascinating topics discussed is evidence that early Muslims did not understand Muhammad's original revelation that the ninth century explosion of literary activity was designed to organize and make sense of an often incoherent text and that much of the traditions surrounding Muhammad's life were fabricated long after his death in an attempt to give meaning to the Koran Also of interest are suggestions that Coptic and other Christian sources heavily influenced much of the text and that some passages reflect an essential background reaching back to the community of the Dead Sea Scrolls This valuable compilation will be a welcome resource to interested lay readers and scholars alike
