of the car better, and throwing light down side streets as well as important point in city driving. The head lights are water and dust proof.

One of the most attractive features is the Lock Switch located on the dash board. This is operated by a Yale key so that when it is turned to the position "Night" the signal lights are turned on and locked on, and cannot be turned off from the main switch, and the car cannot be started or stopped with. When the key is turned to the position "Day" the magnets is grounded the lamp cannot be lighted, the motor and lens are impervious, the car is heavy. When the key is turned to the third position, "On" everything is allowed for operation.

A new feature is the ray light, which is lit automatically at night when the door is opened, illuminating the way and the ground near it. Another feature is the two-way lamp. The direction of light may be adjusted up or down.

The Folding Top for open bodies can be operated by one man, being raised or lowered with the minimum of trouble. When fully extended the front portion is fastened to the trackboard and does away with straps. There is an adjustment at this point, permitting one slack to be taken out of the top. The top is covered with Patented and lined with a hard lining. When the top is folded down a clip can be used to hold it up and keep out the dust.

All bodies are equipped with an adjustable hot seat. A hiding side rail is also provided at the back of the front seat.

Left Drive with Right Hand Control is used with best third arrangement. The gear levers are operated by the right hand, which is safest and most natural. On the dash board is placed a four button switch. The buttons are marked "Head Light", "Side Light", "Fuel", "Starter". A single button flashing switch for reducing the power of the head light is also provided. Another feature is the combination Speedometer, Odometer and Clock located in the corner of the dash board and work back. The dash board is illuminated, making the reading of these instruments easy at night. The electric horn is concealed under the bonnet. An oil can is also located under the bonnet and is connected to a special feature. Compressed air for inflating tires is supplied by a power-driven pump which has two cylinders, thus obtaining a pressure tank. A radiator space for covering the lower portion of the radiator in cold weather is also provided. Two spare tires are supplied.
