Marshmallow Test Walter Mischel, 2023 **Self-Control** Marcela Herdova, Stephen Kearns, Neil Levy, 2022-12-30 Self control is a fundamental part of what it is to be a human being It poses important philosophical and psychological questions about the nature of belief motivation judgment and decision making More immediately failures of self control can have high costs resulting in ill health loss of relationships and even violence and death whereas strong self control is also often associated with having a virtuous character What exactly is self control If we lose control can we still be free Can we be held responsible for loss of self control In this thorough and clearly written

introduction to the philosophy of self control the authors examine and assess the following topics and questions The importance of self control What is self control Self control and the law of desire Mechanisms of self control How is it possible to lose self control Blameworthiness and the loss of self control Externalist self control Pathologies of self control Combining philosophical analysis with surveys of the latest psychological research and including chapter summaries suggestions for further reading and a glossary of key terms Self Control is essential reading for students of philosophy of mind and psychology moral psychology free will and ethics It will also be of interest to those in related fields such as psychology and cognitive science

The Secret of My Child's Success Gisel Hazan,2017-03-20 Every parent brings her his child into the world wishing that the child will be healthy happy and successful What is SUCCESS and what is the SECRET of being successful There are two different ideas in the education world Does the child develop a personality by nature or by nurture Even if we accept both views to a certain degree we need to know that every minute we can educate and change ourselves by improving our brain s functioning In recent years even people who were raised under difficult conditions have been able to find opportunities to improve and educate themselves thanks to self help books This book draws on my educational and professional experience on child psychology as well as on information derived from other helpful books We should perform our parenthood duties as set forth in the famous Khalil Gibran poem Children At the end of my book an unexpected surprise will surprise you Please read until the end of my book to learn what the surprise is

Parenting in the Age of Attention Snatchers Lucy Jo Palladino,2015-04-28 Are your kids unable to step away from the screens Here is a practical step by step guide that gives parents the tools to teach children from toddlers to teens how to gain control of their technology use As children spend more of their time on tablets and smartphones using apps specially engineered to capture their attention parents are concerned about the effects of so much technology use and feel powerless to intervene They want their kids to be competent and competitive in their use of technology but they also want to prevent the attention problems that can develop from overuse Lucy Jo Palladino shows that the key is to help kids build awareness and control over their own attention and in this guide she gives parents the tools to do exactly that in seven straightforward evidence based steps Parents will learn the best practices to guide children to understand and control their attention and to recognize and resist when their attention is being snatched This approach can be modified for kids of all ages Parents will also learn the critical difference between voluntary and involuntary attention new findings about brain development and what puts children at risk for attention disorders

Learning and Memory David A. Lieberman,2020-11-05 A stimulating introduction to human learning and memory written in a lively style to engage students in critical thinking

The Gospel of Happiness Christopher Kaczor,2015-09-08 What is true happiness How can you experience it And can you live it wholeheartedly in your day to day life Every thoughtful person asks such questions Thoughtful Christians ask a few more questions such as Can Christian practices enhance happiness If so how And does Christianity provide happiness in a way that other paths like psychology

cannot Christopher Kaczor suggests answers to these and other questions about how to be happier In *The Gospel of Happiness* the bestselling author of *The Seven Big Myths of the Catholic Church* highlights seven ways in which positive psychology and Christian practice can lead to personal and spiritual transformation Focusing on empirical findings in positive psychology that point to the wisdom of many Christian practices and teachings the author provides not only practical suggestions on how to become happier in everyday life but provides insight on how to deepen Christian practice and increase love of God and neighbor in new and bold ways Part of the Christian message is that authentic happiness is to be found not in selfishness but self giving writes Dr Kaczor In this book I highlight the many ways in which positive psychology and Christian practice overlap All of this points us toward deeper fulfillment in this life and in the life to come *Ethical Excellence* Heidi M. Giebel, 2020-11-24 Why do some people achieve ethical excellence while others fail For example how did Gloria Lewis overcome a lifetime of difficulty and go on to found a non profit focused on feeding the homeless while Danny Starrett despite a seemingly ideal childhood became a rapist and murderer Why did some Germans rescue their Jewish neighbors while others stood by One recent study found that four personal variables taken together differentiated Nazi era bystanders from rescuers with startling 96.1% accuracy social responsibility altruistic moral reasoning empathic concern and risk taking traits related to ethical excellences virtues like justice benevolence and courage Drawing from the combined wisdom of classical Socratic and Confucian philosophy recent work in psychology and the lived experience of recognized moral heroes the book focuses on how each of us can work toward ethical excellence becoming more like Lewis and neighbor rescuers than like Starrett and Nazi era bystanders The ancient Socratic and Confucian philosophical traditions offer surprisingly sophisticated advice regarding moral education Because research in psychology helps us assess the feasibility of cultivating virtue in ourselves and those we influence *Ethical Excellence* focuses on combining sound philosophical analysis of ethical virtue and related concepts with relevant empirical research on how these concepts are manifested and developed in everyday practice Willpower for example contributes to development of temperance or moderation grit relates to perseverance and empathy is connected to benevolence Finally the study of ethically exceptional people moral heroes or exemplars serves as living proof that ethical excellence is possible and exemplars can provide inspiration to attempt it ourselves and guidance regarding how to do so successfully Relevant stories and excerpts from the author's own interviews with award winning ethical exemplars complement the use of philosophical virtue theory and psychological research on virtue relevant practice Together these three approaches philosophy psychology and biography help to triangulate ethical excellence and its achievement presenting a much clearer and more complete picture than we can get from any one of these methods alone *The Stressed Years of Their Lives* Dr. B. Janet Hibbs, Dr. Anthony Rostain, 2019-04-23 From two leading child and adolescent mental health experts comes a guide for the parents of every college and college bound student who want to know what's normal mental health and behavior what's not and how to intervene before it's too late The title says it

all Chock full of practical tools resources and the wisdom that comes with years of experience The Stressed Years of their Lives is destined to become a well thumbed handbook to help families cope with this modern age of anxiety Brigid Schulte Pulitzer Prize winning journalist author of Overwhelmed and director of the Better Life Lab at New America All parenting is in preparation for letting go However the paradox of parenting is that the more we learn about late adolescent development and risk the more frightened we become for our children and the more we want to stay involved in their lives This becomes particularly necessary and also particularly challenging in mid to late adolescence the years just before and after students head off to college These years coincide with the emergence of many mood disorders and other mental health issues When family psychologist Dr B Janet Hibbs s own son came home from college mired in a dangerous depressive spiral she turned to Dr Anthony Rostain Dr Rostain has a secret superpower he understands the arcane rules governing privacy and parental involvement in students mental health care on college campuses the same rules that sometimes hold parents back from getting good care for their kids Now these two doctors have combined their expertise to corral the crucial emotional skills and lessons that every parent and student can learn for a successful launch from home to college
