Lewis, 2015-04-30 Over the past decade a group of prolific and innovative evolutionary biologists has sought to reinvent historical linguistics through the use of phylogenetic and phylogeographical analysis treating cognates like genes and conceptualizing the spread of languages in terms of the diffusion of viruses Using these techniques researchers claim to have located the origin of the Indo European language family in Neolithic Anatolia challenging the near consensus view that it emerged in the grasslands north of the Black Sea thousands of years later But despite its widespread celebration in the global media this new approach fails to withstand scrutiny As languages do not evolve like biological species and do not spread like viruses the model produces incoherent results contradicted by the empirical record at every turn This book asserts that the origin and spread of languages must be examined primarily through the time tested techniques of linguistic analysis rather than those of evolutionary biology **1177 B.C.** Eric H. Cline, 2021-02-02 A bold reassessment of what caused the Late Bronze Age collapse In 1177 B C marauding groups known only as the Sea Peoples invaded Egypt The pharaoh s army and navy managed to defeat them but the victory so weakened Egypt that it soon slid into decline as did most of the surrounding civilizations After centuries of brilliance the civilized world of the Bronze Age came to an abrupt and cataclysmic end Kingdoms fell like dominoes over the course of just a few decades No more Minoans or Mycenaeans No more Trojans Hittites or Babylonians The thriving economy and cultures of the late second millennium B C which had stretched from Greece to Egypt and Mesopotamia suddenly ceased to exist along with writing systems technology and monumental architecture But the Sea Peoples alone could not have caused such widespread breakdown How did it happen In this major

new account of the causes of this First Dark Ages Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures ranging from invasion and revolt to earthquakes drought and the cutting of international trade routes Bringing to life the vibrant multicultural world of these great civilizations he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries A compelling combination of narrative and the latest scholarship 1177 B C sheds new light on the complex ties that gave rise to and ultimately destroyed the flourishing civilizations of the Late Bronze Age and that set the stage for the emergence of classical Greece *Philosophers of War* Daniel Coetzee, Lee W. Eysturliid, 2013-10-21 This user friendly reference systematically covers the entire intellectual history of strategy and war in all cultures and all times Each culture has had its Machiavelli its Sun Tzu its own Mohammed like or Napoleonic figure This encyclopedia ranges across the world to provide entries on every significant military and strategic thinker in human history as well as a number of military cultures covering Chinese Western Indian Islamic and other cultures Each entry supplies a brief biography a synopsis of the writer s theories their success or failure and their impact on other thinkers and military practitioners The unique coverage allows readers to cross cultural barriers and gain access to sources in languages as diverse as Arabic and German and to note key similarities and contrasts The relative importance and contribution of each individual to intellectual progress is noted as is the greater significance of specific schools of thought and debates Islam and Christianity Contrasted Ed Ward, 2021 My first exposure to Muslims was in 2005 in Morocco I enjoyed my visit and was surprised by the Berbers hospitality I was fascinated by the eagerness of Muslims to discuss God While sharing personal stories was important our conversations always concluded with talking about God Discussions about our faiths was the foremost topic of my conversations with Muslims Over the years I have compared the teachings of Islam with the Christian Scriptures I have found the narratives differing in detail and concepts conflicting in perspective These theological differences confirm that Islam and Christianity do not worship the same God For example the Quran teaches that Allah commanded angels to bow down to Adam at creation Satan refused and Allah banished him to the earth Qu 7 11 13 According to the Bible Yhwh would never command angels to bow down to man for only Yhwh is worthy of worship For an angel to bow down to man is idolatry I have observed many debates between Muslims and Christians Muslim debaters seldom stay on the agreed topic Instead they divert from the subject to ridicule and debase Christianity as foolishness I have found that while Muslims ask difficult questions of Christianity they never ask the same questions of Islam Islam and Christianity Contrasted will seek answers to those questions from the early Islamic sources and compare them with the teachings of the Bible The Quran early hadiths Islamic history and four established translations of the Bible will be consulted I hope that through Islam and Christianity Contrasted both Muslims and Christians will have a deeper understanding of one another s faith *Equine Welfare in Clinical Practice* Virginia Wensley Koch, 2024-08-29 Equine Welfare in Clinical Practice

The Intimate Bond Brian Fagan, 2015-04-14. Animals and our ever-changing relationship with them have left an indelible mark on human history. From the dawn of our existence, animals and humans have been constantly redefining their relationship with one another, and entire civilizations have risen and fallen upon this curious bond we share with our fellow fauna. Brian Fagan unfolds this fascinating story from the first wolf who wandered into our prehistoric ancestors' camp and

found companionship to empires built on the backs of horses donkeys and camels to the industrial age when some animals became commodities often brutally exploited and others became pets nurtured and pampered sometimes to absurd extremes Through an in depth analysis of six truly transformative human animal relationships Fagan shows how our habits and our very way of life were considerably and irreversibly altered by our intimate bond with animals Among other stories Fagan explores how herding changed human behavior how the humble donkey helped launch the process of globalization and how the horse carried a hearty band of nomads across the world and toppled the emperor of China With characteristic care and penetrating insight Fagan reveals the profound influence that animals have exercised on human history and how in fact they often drove it

breed profiles This is an essential addition to every horse enthusiasts library [The Horsemen of Israel](#) Deborah O'Daniel Cantrell,2011-06-30 Almost every book in the Hebrew Bible mentions horses and chariots in some manner usually in a military context However the importance of horses chariots and equestrians in ancient Israel is typically mentioned only in passing if at all by historians hippologists and biblical scholars When it is mentioned the topic engenders a great deal of confusion Notwithstanding the substantial textual and archaeological evidence of the horse s historic presence recent scholars seem to be led by a general belief that there were very few horses in Iron Age Israel and that Israel s chariotry was insignificant The reason for this current sentiment is tied primarily to the academic controversy of the past 50 years over whether the 17 tripartite pillared buildings excavated at Megiddo in the early 20th century were in fact stables Although the original excavators archaeologists from the University of Chicago designated these buildings as stables a number of scholars and a few archaeologists later challenged this view and adopted alternative interpretations After they reassessed the Megiddo stables as storehouses marketplaces or barracks the idea developed that there was no place for the horses to be kept and therefore there must have been few horses in Israel The lack of stables when added to the suggestion that Iron Age Israel could not have afforded to buy expensive horses and maintain an even more expensive chariotry led to a dearth of horses in ancient Israel or so the logic goes that has permeated the literature Cantrell s book attempts to dispel this notion Too often today scholars ignore or diminish the role of the horse in battle It is important to remember that ancient historians took for granted knowledge about horses that modern scholars have now forgotten or never knew Cantrell s involvement with horses as a rider competitor trainer breeder and importer includes equine experience ranging from competitive barrel racing to jumping and for the past 25 years dressage The Horsemen of Israel relies on the author s knowledge of and experience with horses as well as her expertise in the field of ancient Near Eastern languages literature and archaeology

picture of the discipline of ancient gender and sexuality studies showcasing the work of leading international scholars as well as that of emerging talents and new voices Sexuality and gender in the ancient world is an area of research that has grown quickly with often sudden shifts in focus and theoretical standpoints This volume contextualises these shifts while putting in place new ideas and avenues of exploration that further develop this lively field or set of disciplines This broad study also includes studies of gender and sexuality in the Ancient Near East which not only provide rich consideration of those areas but also provide a comparative perspective not often found in such collections Sex in Antiquity is a major contribution to the field of ancient gender and sexuality studies **The Spirited Horse** Laerke Recht, 2022-05-19 Presenting a new perspective on human animal relations in the ancient Near East this volume considers how we should understand equids horses donkeys onagers and various hybrids as animals that are social actors Recht brings together a wealth of new data including Bronze Age Near Eastern material culture from a range of archaeological contexts with equid remains as well as iconography and texts She looks in particular at finds of equids themselves from burials sacred space and settlements alongside associated artefacts such as chariots and harnesses This is the first time the agency of animals is recognized The study is essential reading for prehistorians archaeologists and those studying early animal domestication showcasing how humans encounter and interact with other animals and how those animals in turn interact with humans Recht outlines the broader implications for human involvement with their environment both today and in the past and points to further study in a number of focused appendices *Proceedings.
