Historical Dictionary of Environmentalism Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas, events, institutions, initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa, Asia, South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate, governmental and intergovernmental organizations and initiatives

This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

The Governance Structures of the Bretton Woods

Financial Institutions Ahmed Naciri, 2018-09-11 This book uses institutional data to examine and analyze the current governance structures of Multilateral Financial Institutions MFIs with the ultimate goal of reforming MFI governance models to be more responsive to the needs of developing countries Founded in the post World War II era MFIs collectively known as the Bretton Woods Financial Institutions BWFI were created to promote global economic development and financial stability This book argues however that the governance structures and policies of the MFIs have been biased in favour of developed country members excluding less economically advanced countries from decision making processes and perpetuating the economic status quo Considering the inability of MFIs to adequately respond to the financial needs of developing countries the book raises an alternative proposal for BWFI reform based on the following criteria i encouraging development incentives ii favouring development learning through knowledge transfer and easing its appropriation by developing countries and iii guiding and facilitating access to private international financial markets Combining historical economic analysis with policy recommendations for the future this book will be of particular interest to students and researchers of development economics governance and MFIs as well as practitioners working with the institutions studied

Employment and Inclusive

Development Rizwanul Islam, Iyanatul Islam, 2015-02-11 Issues relating to employment and labour have once again come to the fore of global policy debates in the wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a growing realization that productive employment promotion and social protection have to be at the core of inclusive growth and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and employability youth employment the benefits and costs of labour market flexibility

and the importance of social protection for all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think tanks international organizations bilateral donors working on development issues and policy makers in developing countries Natural Resources Conservation and Advances for Sustainability Manoj Kumar Jhariya,Ram Swaroop Meena,Arnab Banerjee,Surya Nandan Meena,2021-09-24 Natural Resources Conservation and Advances for Sustainability addresses the latest challenges associated with the management and conservation of natural resources It presents interdisciplinary approaches to promote advances in solving these challenges By examining what has already been done and analyzing it in the context of what still needs to be done particularly in the context of latest technologies and sustainability the book helps to identify ideal methods for natural resource management and conservation Each chapter begins with a graphical abstract and presents complicated or detailed content in the form of figures or tables In addition the book compares the latest techniques with conventional techniques and troubleshoots conventional methods with modifications making it a practical resource for researchers in environmental science and natural resource management Discusses the pros and cons of past and current endeavors related to natural resource management Presents recent technologies and methods for management and conservation particularly with applications for sustainability Covers a variety of disciplines from environmental science to life science Includes a graphical abstract as well as a section on significant achievements in the field and future perspectives **ICTs for Inclusive Communities in Developing Societies** Darelle van Greunen,Jacques Steyn,2015-11-25 Several decades of international aid predominantly granted by the highly developed world the haves for the use of ICT in developing regions known by several labels such as the have nots bottom of the pyramid the south or some time ago the third world have passed but the holy grail of turning these societies into the ideals defined by the donors is still elusive Previously the emphasis was on top down approaches in this endeavour Now priority is increasingly given to bottom up approaches putting the targeted communities first using methods such as co creation and living labs Information and Communication Technologies for Development ICT4D is still a domain in search of a common ground The many different perspectives from diverse ideologies paradigms and theoretical perspectives here lead to an interesting debate but meanwhile agents of social change are doing their best to change communities ostensibly for the better An ongoing endeavour this discussion requires further investigation of the complexities of techno societies The contributions to this volume range from explorations of theory models and methods to investigations into the practical implementation of ICT in communities covering the characteristics of social groups and different generations and gender issues as well as its applications in education and health As such the contributions in this book will inform continuing debates concerning the role of ICT in developing communities on the wrong side of all the technical and social divides in human societies **Climate Change, Food Security and Natural Resource Management**

Mohamed Behnassi, Olaf Pollmann, Himangana Gupta, 2018-11-15 This book contributes to the on going debates on climate change by focusing on the SDGs and exploring linkages between environmental change and food security as well as the relevance and need to consider the management of natural resources especially water soil and forest Compared to relevant existing publications this book covers case studies that capture the everyday realities of the local people and how they react and adapt to similar situations in different geographical settings Each case study presented in this book gives a particular message The strength of this book lies in the fact that it covers the most neglected topics in climate negotiations in spite of the fact that these decide the fate of millions of people around the world especially the developing countries By presenting a collection of case studies from Africa Asia and Europe this book encourages cross continental knowledge sharing The scope of the book ranges from impacts to mitigation and from in field experiments to policy implementation It contributes to the existing knowledge on climate food nexus and connects climate change to sectors it could impact directly All chapters in this book emphasise local ownership of strategy processes effective participation from all levels and high level commitment Besides being relevant for the academicians and scholars working in the field of climate change forest and agriculture it aims to catch interest of the policy makers and practitioners to understand ground realities for appropriate action It is also bound to make an impact on the Non Governmental Organizations around the world and in the three different continents that this book covers considering the indigenous and local issues highlighted in this book The Little Data Book on Financial Development World Bank Group, 2014-02-19 A pocket edition of the Global Financial Development Database published as part of the work on the Global Financial Development Report 2014 financial inclusion It contains new indicators on financial access in 202 economies including measures of 1 financial depth 2 access 3 efficiency and 4 stability of financial institutions and markets **Social Networking** Anastacia Kurylo, Tatyana Dumova, 2016-03-04 Social Networking Redefining Communication in the Digital Age fulfills a pressing demand in social network literature by bringing together international experts from the fields of communication new media technologies marketing and advertising public relations and journalism business and education In this volume contributors traces online social networking practices across national borders cultural confines and geographic limits The book delves into the socioeconomic political cultural and professional dimensions of social networking around the globe and explores the similarities distinctions and specific characteristics of social media networks in diverse settings The chapters offer an important contribution to the scholarly research on the uses and applications of online social networking around the world and pertain to a broad range of academic fields Overall the volume addresses a subject matter of keen interest to academics and practitioners alike and provides a much needed forum for sharing innovative research practices and exchanging new ideas Rising Powers and South-South Cooperation Kevin Gray, Barry Gills, 2018-10-11 This book examines the extent to which a space has opened up in recent years for the so called rising powers of the global South to offer an alternative to contemporary global economic and political governance through

emergent forms of South South cooperation In contrast to the Third Worldism of the past the contemporary rising powers share in common the fact that their recent growth owes much to their extensive and increasingly international engagement rather than partial withdrawal from the global economy However they are nonetheless openly critical of the perceived bias towards the global North in the dominant institutions of global governance and seek to alter the global status quo to enhance the influence of the global South Contributions to this volume address the question of whether such engagement particularly on a South South basis can be categorised as a win win relationship or whether we are already seeing the emergence of new forms of competitive rivalry and neo dependency in action What kind of theoretical approaches and conceptual tools do we need to best answer such questions To what extent do new groupings such as BRICS suggest a real alternative to the dominance of the West and of the neoliberal economic globalization paradigm What possible alternatives exist within contemporary forms of South South cooperation This book was originally published as a special edition of Third World Quarterly [Africa's trade facilitation preparedness & ethical property rights](#) Gbadebo Odularu, Bamidele Adekunle, Caiphas Chekwoti, 2024-05-01 With the AfCFTA in force and several regional integration initiatives ongoing in Africa effective implementation promises an economic growth and development trajectory that defines the Africa we want as posited by the African policymakers within the context of the African Union's Agenda 2063 This is more evident with emerging dynamics characterised by unprecedented shocks and fast paced evolution in the digital space The implications of these dynamics beckon a rethinking of the strategies for riding on and above the wave This book delves into some of the policy intricacies and generates both insights on emerging shocks digitalisation intellectual property rights and raises interesting issues for further reflection It is a great read that illuminates critical trade issues with important policy implications
