The Modern Savage Our Unthinking Decision To Eat Animals:

The Modern Savage James McWilliams, 2015-01-06 A book that everyone concerned about food animals and the environment should read Peter Singer Princeton Professor and author of *Animal Liberation* [The Modern Savage](#) James McWilliams, 2015-01-06 Just Food author James McWilliams's exploration of the compassionate carnivore movement and the paradox of humanity's relationship with animals In the last four decades food reformers have revealed the ecological and ethical problems of eating animals raised in industrial settings turning what was once the boutique concern of radical eco freaks into a mainstream movement Although animal products are often labeled cage free free range and humanely raised can we trust these goods to be safe sound or ethical In *The Modern Savage* renowned writer historian and animal advocate James McWilliams pushes back against the questionable moral standards of a largely omnivorous world and explores the alternative to the alternative not eating domesticated animals at all In poignant powerful and persuasive prose McWilliams reveals the scope of the cruelty that takes place even on the smallest and supposedly most humane animal farms In a world increasingly aware of animals intelligence and the range of their emotions McWilliams advocates for the only truly moral sustainable choice a diet without meat dairy or other animal products *The Modern Savage* is a riveting expose of an industry that has typically hidden behind a veil of morality and a compelling account of how to live a more economical environmental and ethical life

Six Women Who Shaped What Americans Eat Michelle Mart, 2025-07-15 *Six Women Who Shaped What Americans Eat* tells the story of how food choice in modern America has been influenced by culture industrial abundance and health narratives Mart reflects on the careers of six women to illustrate the varied and overlapping influences on food choice Each of these women had a substantial impact on American cuisine attitudes toward food and what people chose to eat They highlighted the politics of food the pleasure of food the connection between food and health and the environmental harm of poor food choices Part one of the book discusses the bounties of the modern American food system and covers Hazel Stiebeling Poppy Cannon and Julia Child Stiebeling was a chemist and government nutritionist beginning in the 1930s and shaped dietary guidelines and school lunches that affected generations of Americans Cannon a best selling cookbook author and newspaper columnist gained fame in the 1950s by preaching the wonders of processed food Child another cookbook author and television personality starting in the 1960s celebrated French cuisine and made it accessible to American cooks and palates Part two examines the hidden costs of abundance and covers Frances Moore Lapp Marion Nestle and Alice Waters Lapp was an author and activist concerned with the environmental impact of food in the late 20th century and who is credited with bringing vegetarianism into the mainstream Nestle was an academic nutritionist government consultant and author who decried the undue influence of food corporations Waters a celebrity chef restaurateur and food activist became a symbol of alternative food movements in the 21st century Provided by publisher [Humans and Animals](#) Julie Urbanik, Connie L. Johnston, 2017-01-26 An engaging and at times sobering look at the coexistence of humans and

animals in the 21st century and how their sometimes disparate needs affect environments politics economies and culture worldwide There is an urgent need to understand human animal interactions and relations as we become increasingly aware of our devastating impact on the natural resources needed for the survival of all animal species This timely reference explores such topics as climate change and biodiversity the impact of animal domestication and industrial farming on local and global ecosystems and the impact of human consumption of wild species for food entertainment medicine and social status This volume also explores the role of pets in our lives advocacy movements on behalf of animals and the role of animals in art and media culture Authors Julie Urbanik and Connie L Johnston introduce the concept of animal geography present different aspects of human animal relationships worldwide and highlight the importance of examining these interconnections Alphabetical entries illustrate key relationships concepts practices and animal species The book concludes with a comprehensive appendix of select excerpts from key primary source documents relating to animals and a glossary

Meat Makes People Powerful Wilson J. Warren, 2018-02-15 From large scale cattle farming to water pollution meat more than any other food has had an enormous impact on our environment Historically Americans have been among the most avid meat eaters in the world but long before that meat was not even considered a key ingredient in most civilizations diets Labor historian Wilson Warren who has studied the meat industry for more than a decade provides this global history of meat to help us understand how it entered the daily diet and at what costs and benefits to society Spanning from the nineteenth century to current and future trends Warren walks us through the economic theory of food the discovery of protein the Japanese eugenics debate around meat and the environmental impact of livestock among other topics Through his comprehensive multifaceted research he provides readers with the political economic social and cultural factors behind meat consumption over the last two centuries With a special focus on East Asia **Meat Makes People Powerful** reveals how national governments regulated and oversaw meat production helping transform virtually vegetarian cultures into major meat consumers at record speed As more and more Americans pay attention to the sources of the meat they consume Warren's compelling study will help them not only better understand the industry but also make more informed personal choices Providing an international perspective that will appeal to scholars and nutritionists alike this timely examination will forever change the way you see the food on your plate

Why We Love and Exploit Animals Kristof Dhont, Gordon Hodson, 2019-11-08 This unique book brings together research and theorizing on human animal relations animal advocacy and the factors underlying exploitative attitudes and behaviors towards animals Why do we both love and exploit animals Assembling some of the world's leading academics and with insights and experiences gleaned from those on the front lines of animal advocacy this pioneering collection breaks new ground synthesizing scientific perspectives and empirical findings The authors show the complexities and paradoxes in human animal relations and reveal the factors shaping compassionate versus exploitative attitudes and behaviors towards animals Exploring topical issues such as meat consumption intensive farming

speciesism and effective animal advocacy this book demonstrates how we both value and devalue animals how we can address animal suffering and how our thinking about animals is connected to our thinking about human intergroup relations and the dehumanization of human groups This is essential reading for students scholars and professionals in the social and behavioral sciences interested in human animal relations and will also strongly appeal to members of animal rights organizations animal rights advocates policy makers and charity workers

[The Routledge Handbook of Animal Ethics](#) Bob Fischer, 2019-12-06 There isn't one conversation about animal ethics Instead there are several important ones that are scattered across many disciplines This volume both surveys the field of animal ethics and draws professional philosophers graduate students and undergraduates more deeply into the discussions that are happening outside of philosophy departments To that end the volume contains more nonphilosophers than philosophers explicitly inviting scholars from other fields such as animal science ecology economics psychology law environmental science and applied biology among others to bring their own disciplinary resources to bear on matters that affect animals The Routledge Handbook of Animal Ethics is composed of 44 chapters all appearing in print here for the first time and organized into the following six sections I Thinking About Animals II Animal Agriculture and Hunting III Animal Research and Genetic Engineering IV Companion Animals V Wild Animals Conservation Management and Ethics VI Animal Activism The chapters are brief and they have been written in a way that is accessible to serious undergraduate students regardless of their field of study The volume covers everything from animal cognition to the state of current fisheries from genetic modification to intersection animal activism It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals

The Routledge History of American Foodways Michael D. Wise, Jennifer Jensen Wallach, 2016-02-12 The Routledge History of American Foodways provides an important overview of the main themes surrounding the history of food in the Americas from the pre colonial era to the present day By broadly incorporating the latest food studies research the book explores the major

advances that have taken place in the past few decades in this crucial field The volume is composed of four parts The first part explores the significant developments in US food history in one of five time periods to situate the topical and thematic chapters to follow The second part examines the key ingredients in the American diet throughout time allowing authors to analyze many of these foods as items that originated in or dramatically impacted the Americas as a whole and not just the United States The third part focuses on how these ingredients have been transformed into foods identified with the American diet and on how Americans have produced and presented these foods over the last four centuries The final section explores how food practices are a means of embodying ideas about identity showing how food choices preferences and stereotypes have been used to create and maintain ideas of difference Including essays on all the key topics and issues The Routledge History of American Foodways comprises work from a leading group of scholars and presents a comprehensive survey of the current state of the field It will be essential reading for all those interested in the history of food in American culture

Literary Bioethics Maren Tova Linett, 2020-07-14 Uses literature to understand and remake our ethics regarding nonhuman animals old human beings disabled human beings and cloned posthumans Literary Bioethics argues for literature as an untapped and essential site for the exploration of bioethics Novels Maren Tova Linett argues present vividly imagined worlds in which certain values hold sway casting new light onto those values and the more plausible and well rendered readers find these imagined worlds the more thoroughly we can evaluate the justice of those values In an innovative set of readings Linett thinks through the ethics of animal experimentation in H G Wells s *The Island of Doctor Moreau* explores the elimination of aging in Aldous Huxley s *Brave New World* considers the valuation of disabled lives in Flannery O Connor s *The Violent Bear It Away* and questions the principles of humane farming through reading Kazuo Ishiguro s *Never Let Me Go* By analyzing novels published at widely spaced intervals over the span of a century Linett offers snapshots of how we confront questions of value In some cases the fictions are swayed by dominant devaluations of nonnormative or nonhuman lives while in other cases they confirm the value of such lives by resisting instrumental views of their worth views that influence explicitly or implicitly many contemporary bioethical discussions especially about the value of disabled and nonhuman lives Literary Bioethics grapples with the most fundamental questions of how we value different kinds of lives and questions what those in power ought to be permitted to do with those lives as we gain unprecedented levels of technological prowess

The Virginia Quarterly Review ,2016 **Unnaturally Delicious** Jayson Lusk, 2016-03-22 The food discussion in America can be quite pessimistic With high obesity rates diabetes climate change chemical use water contamination and farm animal abuse it would seem that there wasn t very much room for a positive perspective The fear that there just isn t enough food has expanded to new areas of concern about water availability rising health care costs and dying bees In *Unnaturally Delicious* Lusk makes room for optimism by writing the story of the changing food system suggesting that technology and agriculture can work together in a healthy and innovative way to help solve the world s largest food issues and improve the farming system as we know it This is the story of the innovators and innovations shaping the future of food You ll meet an ex farmer entrepreneur whose software is now being used all over the world to help farmers increase yields and reduce nutrient runoff and egg producers who ve created new hen housing systems that improve animal welfare at an affordable price There are scientists growing meat in the lab Without the cow College students are coaxing bacteria to signal food quality and fight obesity Nutrient enhanced rice and sweet potatoes are aiming to solve malnutrition in the developing world Geneticists are creating new wheat varieties that allow farmers sustainably grow more with less And we ll learn how to get fresh tasty 3D printed food at the touch of a button perhaps even delivered to us by a robotic chef Innovation is the American way Thomas Jefferson George Washington Carver and John Harvey Kellogg were food and agricultural entrepreneurs Their delicious innovations led to new healthy tasty convenient and

environmentally friendly food The creations were unnaturally delicious Unnatural because the foods and practices they fashioned were man made solutions to natural and man made problems Now the world is filled with new challenges changing the way we think about food Who are the scientists entrepreneurs and progressive farmers who meet these challenges and search for solutions Unnaturally Delicious has the answers *Voir son steak comme un animal mort* Martin

Gibert,2015-05-07T00:00:00-04:00 La plupart des gens d sistent le bien des animaux Mais voil ils aiment aussi leur steak C est ce qu on appelle le paradoxe de la viande Nous ne voulons pas voir que ce que nous mangeons c est de l animal mort De plus en plus de chercheurs expliquent ce ph nom ne de dissonance cognitive par des pratiques sociales et des croyances qui visent pr cis ment occulter la souffrance animale Tout converge pour nous convaincre depuis l enfance qu il est normal naturel et n cessaire de consommer des produits d origine animale Pourtant dans les faits rien n est moins vrai tant du point de vue de la sant que de l thique animale et environnementale Dans cet essai accessible et engag Martin Gibert propose une synth se des d bats contemporains sur le paradoxe de la viande Ce faisant il pr sente le v ganisme un mouvement moral et politique en pleine mergence qui lutte pour la justice animale sociale et environnementale *Eating Promiscuously* James

McWilliams,2018-05-08 A bold and bracing argument for the complete reimagining of the human diet by the critically acclaimed author of *Just Food* The human practice of farming food has failed There are 7 500 known varieties of domesticated apples we regularly eat about five Seventy five percent of the world s food derives from five animals and twelve plants Factory farmed meat is a major source of greenhouse gas emissions about 14 percent larger than transportation and consumes 75 percent of the water in drought prone regions such as the West We are stuck in a rut of limited choices ad the vast majority of what we eat is detrimental to our health and the welfare of the planet But what if we could eliminate agriculture as we know it What if we could start over James McWilliams s search for more expansive palate leads him to those who are actively exploring the fringes of what we can eat a group of outliers seeking nutrition innovation outside the industrial food system Here we meet insect manufacturers seaweed harvesters road kill foragers plant biologists and oyster farmers who seek to open both our minds and our mouths and to overturn our most basic assumptions about food health and ethics *Eating Promiscuously* generates hope for a more tasteful future one in which we eat thousands of foods rather than dozens with a new philosophy that could save both ourselves and our planet *Youth's Companion* ,1906 *Eating Animals*
