Handbook of Research on Enterprise Systems Gupta, Jatinder N. D., Sharma, Sushil, Rashid, Mohammad A., 2009-01-31 Addresses the field of enterprise systems covering progressive technologies leading theories and advanced applications

Management of Information Systems Paul Gray, 1994 **Database Management for Microcomputers** Jan L. Harrington, 1994 This book is primarily intended for use as a text in a database management course that approaches the subject as a business application It can also be the basis for a short intensive relational database design seminar Features The first part of the text focuses on design of relational databases from how systems work to maximising relational design Chapter 2 reviews the systems development cycle for students who have not recently studied systems analysis and design The second portion of the text focuses on data manipulation including relational algebra QBE interactive SQL and database integrity The final portion of the text presents the main issues of multiuser databases and data management Examples in the book involve two case studies Small Bank and Federated Taxi Company Two additional case studies form the basis for end of chapter exercises End of chapter discussion questions and exercises encourage students to view concepts in different contexts and give practice in assessing user needs formulating good relational designs and creating effective queries

Understanding Computers & Information Processing Parker, 1994 **Computer Books and Serials in Print**, 1985

Understanding Computers & Information Processing Charles S. Parker, 1994 **Information & Management**, 1996 Introduction to Programming with Quick Basic 3.5 Head, 1995 *Interconnecting Heterogeneous Information Systems* Athman Bouguettaya, Boualem Benatallah, Ahmed K. Elmagarmid, 2012-12-06 Information systems are the backbone of many of today's computerized applications Distributed databases and the infrastructure needed to support them have been

well studied However this book is the first to address distributed database interoperability by examining the successes and failures various approaches infrastructures and trends of the field A gap exists in the way that these systems have been investigated by real practitioners This gap is more pronounced than usual partly because of the way businesses operate the systems they have and the difficulties created by systems autonomy and heterogeneity Telecommunications firms for example must deal with an increased demand for automation while at the same time continuing to function at their current level While academics are focusing on investigating differences between distributed databases federated databases heterogeneous databases and more generally among loosely connected and tightly coupled systems those who have to deal with real problems right away know that the only relevant research is the one that will ensure that their system works to produce reasonably correct results Interconnecting Heterogeneous Information Systems covers the underlying principles and infrastructures needed to realize truly global information systems The book discusses technologies related to middleware the Web workflows transactions and data warehousing It also overviews architectures with a discussion of critical issues The book gives an overview of systems that can be viewed as learning platforms While these systems do not translate to successful commercial realities they push the envelope in terms of research Successful commercial systems have benefited from the experiments conducted in these prototypes The book includes two case studies based on the authors own work Interconnecting Heterogeneous Information Systems issuitable as a textbook for a graduate level course on Interconnecting Heterogeneous Information Systems as well as a secondary text for a graduate level course on database or information systems and as a reference for researchers and practitioners in industry Scientific and Technical Aerospace Reports

,1994 Books in Print Supplement ,1994 *Sustainable Radio Frequency Identification Solutions* Cristina Turcu,2010-02-01 Radio frequency identification RFID is a fascinating fast developing and multidisciplinary domain with emerging technologies and applications It is characterized by a variety of research topics analytical methods models protocols design principles and processing software With a relatively large range of applications RFID enjoys extensive investor confidence and is poised for growth A number of RFID applications proposed or already used in technical and scientific fields are described in this book Sustainable Radio Frequency Identification Solutions comprises 19 chapters written by RFID experts from all over the world In investigating RFID solutions experts reveal some of the real life issues and challenges in implementing RFID *Whitaker's Cumulative Book List* ,1979 Object-oriented Multidatabase Systems Omran Bukhres,Ahmed K. Elmagarmid,1996 The first book to use object oriented techniques for multidatabase problems The authors show how to solve the problems of databases talking to each other using an object oriented approach

Records Management and Information Culture Gillian Oliver, Fiorella Foscarini, 2014-01-20 This book explores how an understanding of organisational information culture provides the insight necessary for the development and promotion of sound recordkeeping practices. It details an innovative framework for analysing and assessing information culture and indicates how to use this knowledge to change behaviour and develop recordkeeping practices that are aligned with the specific characteristics of any workplace. This framework addresses the widely recognised problem of improving organisation wide compliance with a records management programme by tackling the different aspects that make up the organisation's information culture. Discussion of topics at each level of the framework includes strategies and guidelines for assessment followed by suggestions for next steps, appropriate actions and strategies to influence behavioural change. Key topics covered include background and context, the value accorded to records, information preferences, language considerations and regional technological infrastructure, information related competencies, awareness of environmental requirements relating to records, corporate information technology governance, trust in recordkeeping systems, bringing it all together. Archivists, records managers and information technology specialists will find this an invaluable guide to improving their practice and solving the people problem of non compliance with records management programmes. LIS students taking archives and records management modules will also benefit from the application of theory into practice. Records management and information management educators will find the ideas and approaches discussed in this book useful to add an information culture perspective to their curricula.
