Delivering Successful PMOs Peter Taylor, Ray Mead, 2016-03-09. Delivering Successful PMOs is intended to be the companion book to Leading Successful PMOs by Peter Taylor, which was a guide to all project based organisations providing a common language to describe the variety of possible PMOs, explaining how to do the right things in the right way in the right order with the right team and identifying what made a good PMO leader. Delivering Successful PMOs takes this to the next level and provides a clear framework to conceive, design, build, prove and embody an enterprise PMO inside an organisation dealing with the strategic intentions, the politics, the people and the projects. The book draws on the rare experience that Ray Mead brought through his organisation p3m global, which he had in building an enterprise PMO for a major organisation based in the Middle East from the ground up, a greenfield enterprise PMO. Through this process, he and his team have developed an invaluable methodology that is shared through this book alongside a real case study. This is not theory; this is not perfect world modelling; this is proven through practice and live application. Peter and Ray extend the guidelines from the first book and weave them in to the process of delivering a PMO that works for an organisation and delivers success measured by improved project health, greater returns on investment, a better project management community, closer connection to business strategy and a more mature project organisation.

Building Cost Planning for the Design Team Jim Smith, D M Jaggar, Peter Love, 2016-02-26 Cost management of all building projects has become increasingly important as clients in the public and private sector demand the highest quality cost planning services with accurate budgeting and cost control All members of the design team must integrate their activities to ensure that a high quality project is delivered on time and within budget This book considers building cost planning and cost control from the client and the design team's perspective where all decisions whether concerned with design cost quality time value or sustainability are taken as being interrelated The latest Royal Institute of British Architects RIBA Plan of Work and the New Rules of Measurement for Early Stage Estimating and Cost Planning issued by the Royal Institution of Chartered Surveyors RICS have been incorporated into this new text The book follows the building design cost planning process from the crucial inception stages and then through all the design stages to the completion of the technical design contract documentation and the tender It provides a template for good cost planning practice An essential addition to this third edition is the introduction of integrated design and documentation processes captured in building Information modelling BIM on line cost databases and computerised methods of cost planning The integrated approaches are explained and provide vital information and knowledge for practitioners involved in building projects All stakeholders involved in development and design and client teams in public and private sector policy making and implementation need to understand the new approaches to design management processes and how cost planning and design approaches are adapting to using the new technology in practice The interactive style using in text and review questions makes this ideal for students and practitioners alike in property architecture construction economics construction management real estate engineering facilities management and project management
