Nonlinear Photonics Jia-Ming Liu, 2022-01-06 Suitable for both graduate and senior undergraduate students this textbook offers a logical progression through the underlying principles and practical applications of nonlinear photonics Building up from essential physics general concepts and fundamental mathematical formulations it provides a robust introduction to

nonlinear optical processes and phenomena and their practical applications in real world devices and systems Over 45 worked problems illustrate key concepts and provide hands on models for students and over 160 end of chapter exercises supply students with plenty of scope to master the material Accompanied by a complete solutions manual for instructors including detailed explanations of each result and drawing on the author s 35 years of teaching experience this is the ideal introduction to nonlinear photonics for students in electrical engineering New Solutions for an Old Challenge Ronny Merkel,2014 In criminal investigations latent fingerprints are often considered as reliable means of identifying suspects However the evidential value of a print is strongly dependent on the knowledge of its age the time which has passed since deposition Suspects might admit their previous presence at a crime scene but often claim to have been there prior to or after the crime Especially in regard to public or highly frequented crime scenes prints might lose their evidential value in this case potentially leading to dropped charges Despite its high relevance the challenge of estimating a latent print s age could not be adequately addressed for 80 years In this thesis non invasive high resolution capturing devices are for the first time applied to the age estimation challenge replacing classical physical or chemical print development techniques They allow to capture a single print in regular time intervals and to systematically study its degradation behavior Introducing automated processing methods in the form of a digital pipeline including preprocessing feature extraction and age estimation techniques objective age estimates are presented for the first time in this field Maximum classification performances of different capturing devices between 76% and 86% are achieved for two class problems Furthermore a qualitative influence model on the aging speed of latent prints is designed forming a prerequisite for future studies Courses of Instruction, Buildings and Equipment Ohio State University. College of Engineering,1905 *Air Force Manual* United States. Department of the Air Force,1956 **Subject Guide to Books in Print** ,1993 **Scientific and Technical Books in Print** ,1972 *Principles of Photonics* Jia-Ming Liu,2016-08-19 A comprehensive and self contained introductory text covering all the fundamental concepts and major principles of photonics
