Gammeltoft, 2017-08-12 This book explores how conditions for childbearing are changing in the 21st century under the impact of new biomedical technologies. Selective reproductive technologies (SRTs) are technologies that aim to prevent or promote the birth of particular kinds of children and are increasingly widespread across the globe. Wahlberg and Gammeltoft bring together a collection of essays providing unique ethnographic insights on how SRTs are made available within different cultural, socio-economic, and regulatory settings and how people perceive and make use of these new possibilities as they envision and try to form their future lives. Topics covered include sex-selective abortions, termination of pregnancies following detection of fetal anomalies during prenatal screening, the development of preimplantation genetic diagnosis techniques, as well as the screening of potential gamete donors by egg agencies and sperm banks. This is invaluable reading for scholars of medical anthropology, medical sociology, and science and technology studies, as well as for the fields of gender studies, reproductive health, and genetic disease research. *British Abstracts*, 1952 *Index Medicus*, 2004 Vols for 1963 include as pt 2 of the Jan issue. Medical subject headings *Energy Research Abstracts*, 1993 **Genetic Engineering & Biotechnology News**, 2009 *The Digital Doctor* Chayakrit Krittanawong, 2025-01-17 *The Digital Doctor: How Digital Health Can Transform Healthcare* discusses digital health and demonstrates the appropriateness of each technology using an evidence-based approach. It serves as a comprehensive summary on current evidence-based digital health applications, future novel digital health technologies (e.g., mobile health, blockchain, web3.0) as well as some of the current challenges and future directions for digital health within the various medical subspecialties. This book is a comprehensive review of digital health for clinicians, researchers, bioinformatic students, biomedical engineers, and others interested in this topic. It provides a history and overview of the various modalities of digital health and their application within each field of medicine as narrated by leading experts. It discusses current digital health-based medical research, including landmark trials within each field of medicine. It addresses current knowledge gaps that clinicians commonly face that often prevent the application of digital health-based research to clinical practice. LaBerge, Marie Hirtle, 1997-07 *Human DNA: Law and Policy* provides the first international debate on a topic of universal concern. No book has brought together such a diverse range of multidisciplinary ethical and legal expertise on the highly controversial issues surrounding the use, storage, exchange, and sale of the very stuff of which we are made: human genetic material. Testing of human genetic material involves a variety of samples: pathological samples, newborn screening samples, samples leftover after testing, and research samples shared around the world. This places consent issues on an individual, familial, and societal level. The comparative and

international perspectives presented reveal the transnational nature of genetic studies This book focuses on the issues of DNA sampling and testing consent and confidentiality banking policies genetic epidemiology and diversity Since financial and technological pressures are inextricably linked to human genetics research commercialization and patents are also examined Academic researchers policy makers and industry will benefit from the learned papers and reports of the discussion which is rich in diversity of opinion controversial in the diversity of policy and approaches presented anchored on scientific facts and yet sensitive to cultural political and economic differences Transactions of the Royal Canadian Institute Royal Canadian Institute, Canadian Institute (1849-1914), 1928 *Transactions of the Canadian Institute* Canadian Institute (1849-1914), 1927 *Transactions* Canadian Institute (1849-1914), 1927 *Oversight and Management of Department of Energy National Laboratories and Science Activities* United States.
