Architecting Complex-Event Processing Solutions with TIBCO® Paul C. Brown, 2013-09-20 Complex event processing is simple in principle but hard to do well in practice This guide presents the principles and motivations for those new to the subject More importantly it details the entire thought landscape of a complete implementation using TIBCO products as the background Well worth the read for anyone who is thinking of implementing a complex event solution Those who have already implemented one should read it as well both for another perspective and for a view of the capabilities of the TIBCO products Lloyd Fischer Senior Software Architect WellCare Health Plans This complete guide drives you through the specifics of complex event processing CEP design concepts The book covers all the fundamental aspects and design phases relevant for any TIBCO CEP project implementation from design through performance tuning and deployment I would highly recommend this book to any reader interested in CEP concepts although a small amount of TIBCO technology knowledge will let you appreciate it more Antonio Bruno Infrastructure Account Manager UBS AG The architecture series from TIBCO Press comprises a coordinated set of titles for software architects and developers showing how to combine TIBCO components to design and build real world solutions Complex event processing is required when multiple events occurring throughout an organization must be sensed analyzed prioritized and acted on in real time Architecting Complex Event Processing Solutions with TIBCO shows how to design and architect complex event processing systems addressing all their complexities and achieving maximum efficiency and effectiveness while delivering superior business value After reading this book you will be able to Identify opportunities for competitive differentiation through complex event processing Describe differences between complex event processing and traditional systems Understand relevant capabilities of the TIBCO BusinessEvents™ product suite Select building block design patterns for constructing complex event processing solutions with TIBCO BusinessEvents Address architectural aspects of moving solutions into production Implement proven approaches to designing fault tolerance and high availability Architecting Complex Event Processing Solutions with TIBCO is intended for working architects designers and developers who want to apply TIBCO products in complex event processing applications It is also required reading for anyone seeking TIBCO Certified Architect status

Multi-Robot Task Allocation for Inspection Problems with Cooperative Tasks Using Hybrid Genetic Algorithms Liu, Chun, 2014 In this dissertation methods for optimal multi robot task allocation MRTA for industrial plant inspection are investigated MRTA involves distributing and scheduling a set of tasks for a group of robots to minimize the total cost taking into account operational constraints With technical progress and declining cost of robotic mobility interest in industrial mobile robotics has grown significantly in recent years Many efforts have been devoted to mobility related problems such as self localization and mapping though only few studies deal with the optimal task allocation in multi robot systems Since a good task allocation provides more efficient scheduling e g less cost shorter time the objective of this research is to develop search optimization methods for inspection problems that involve

Machine Learning Assisted Evolutionary Multi- and Many- Objective Optimization Dhish Kumar Saxena, Sukrit Mittal, Kalyanmoy Deb, Erik D. Goodman, 2024-05-17 This book focuses on machine learning ML assisted evolutionary multi and many objective optimization EM O EM O algorithms namely EM OAs iteratively evolve a set of solutions towards a good Pareto Front approximation The availability of multiple solution sets over successive generations makes EM OAs amenable to application of ML for different pursuits Recognizing the immense potential for ML based enhancements in the EM O domain this book intends to serve as an exclusive resource for both domain novices and the experienced researchers and practitioners To achieve this goal the book first covers the foundations of optimization including problem and algorithm types Then well structured chapters present some of the key studies on ML based enhancements in the EM O domain systematically addressing important aspects These include learning to understand the problem structure converge better diversify better simultaneously converge and diversify better and analyze the Pareto Front In doing so this book broadly summarizes the literature beginning with foundational work on innovization 2003 and objective reduction 2006 and extending to the most recently proposed innovized progress operators 2021 23 It also highlights the utility of ML interventions in the search post optimality and decision making phases

pertaining to the use of EM OAs Finally this book shares insightful perspectives on the future potential for ML based enhancements in the EM OA domain To aid readers the book includes working codes for the developed algorithms This book will not only strengthen this emergent theme but also encourage ML researchers to develop more efficient and scalable methods that cater to the requirements of the EM OA domain It serves as an inspiration for further research and applications at the synergistic intersection of EM OA and ML domains *Popular Lectures on Science and Art* Dionysius Lardner,1849

Proceedings American Society for Engineering Education. Conference,1993 Earned Benefit Program Management Crispin Piney,2017-10-10 No one can disagree that benefits are good things Whether you are responsible for projects programs or portfolios you are increasingly expected to think and act in an appropriate benefits driven way However Do you understand that what may be appropriate for a project may be inapplicable for a program Can you avoid the trap of wishful thinking based on overinflated expectations and underestimated costs Can you manage your program or portfolio from inception to final delivery in a consistent benefits focused way based on a single coherent model This book describes how Earned Benefit Program Management techniques provide an innovative all inclusive model and set of tools developed specifically to answer these questions This model consolidates the key concepts of project program and portfolio management and ensures that all program and portfolio management steps are carried out based on a single signed off model in a consistent verifiable manner within a consolidated life cycle This approach guarantees alignment with strategic goals and constraints through every stage of a program Case studies highlight the key features of the approach and provide important lessons and insights for managing programs Although the ideas and concepts for each topic are fully consistent with existing standards and other published material they are based on new thinking and go beyond current practice They provide a set of original and powerful techniques that are applicable to both programs and portfolios in a wide range of business environments *Electrons In Metals And Alloys* J. A. Alonso,N. H. March,2012-12-02 This book is a broad review of the electronic structure of metals and alloys It emphasises the way in which the behavior of electrons in these materials governs the thermodynamic and other properties of these conducting materials The theoretical treatment proceeds from a wave mechanics approach to more sophisticated techniques for the description of the properties of metals and alloys
