Bunni,2003-09-02 Those involved in

construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision or operation or any combination of them. This thoroughly revised edition of Nael Bunni's successful book, formerly called *Insurance in Construction*, provides information on risk, construction law and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract and ICE's second edition of the design-build form.

The FIDIC Red Book Contract

Christopher Seppälä, 2023-04-25

Conditions of Contract for Construction known universally as the Red Book published by the International Federation of Consulting Engineers known by its French acronym FIDIC is the most widely used standard form of international construction contract. This book is a detailed commentary on the 2022 reprint of the 2017 FIDIC Red Book. For each of the Red Book's 168 Sub-Clauses, the commentary identifies changes from the 1999 edition, analyses the meaning and significance of the Sub-Clause and lists related Sub-Clauses, describes related international arbitration awards, national court decisions and legal principles and where appropriate proposes amendments to improve the Sub-Clause. As the FIDIC Yellow and Silver Books are very similar to the Red Book, much of the commentary is equally applicable to those forms of contract. The author is a FIDIC insider, having served for more than thirty years as Legal Special Adviser to or Member of the FIDIC Contracts Committee, which is responsible for preparing FIDIC's contracts. This book is an indispensable resource for all parties called on to work with a FIDIC contract. With guidance for every stage of a construction project, whether in drafting, negotiating, performing, interpreting or administering a FIDIC contract, the book's easy-to-use structure includes such issues and topics as the following: introduction to FIDIC and its contracts and to publications of FIDIC and others relevant to the Red Book, including the 2022 FIDIC Contracts Guide; critical examination of each Sub-Clause and advice for amending the same in order to better adapt it to the interests of each party, the Employer or the Contractor; special attention to each Sub-Clause relating to the Contractor's and the Employer's claims and claims procedure and to how to assert claims effectively as well as to time bars and other pitfalls and how they may be overcome; detailed examination of Sub-Clauses relating to the referral of issues or disputes to the Dispute Avoidance/Adjudication Board and, if necessary, to international arbitration and optimal strategies for doing so; discussion of the changes required to the 2017 Red Book by The World Bank's Conditions of Particular Application (COPA) reference where appropriate to the UNIDROIT Principles of International Commercial Contracts and trade usages; comprehensive discussion of practical issues that arise under common

law civil law and international legal principles especially when a contract is with a state or public body comparison of common law and civil law methods of contract interpretation and a suggested practical approach to interpretation given a FIDIC contract s international arbitration clause and overcoming problems that can arise when a contract is governed by the law of a less developed country Legal and technical terms are clearly defined and numerous figures and tables are included to illustrate steps in contract procedures Detailed attention is paid to terminological distinctions among the various legal traditions including a comparison of British English and American English construction contract terms Unquestionably the most detailed and thorough commentary ever published on the FIDIC Red Book this highly practical work enables preparers of FIDIC contracts to amend and adapt the Red Book s provisions to a particular project Dispute adjudicators arbitrators and judges will welcome the book s authoritative guidance on interpreting the provisions of a FIDIC contract and engineers and other construction professionals involved in contract administration will appreciate the book s many practical features

Decision-making in International Construction Arbitration Haytham Besaiso, 2023-10-03 This book contributes to the empirical understanding of how arbitrators make their decisions on the substance of commercial disputes arising from international construction projects It is based on in depth interviews with 28 international construction arbitrators and on the analysis of dozens of international construction arbitration awards The combined experience of those who participated in the author s research amounted to hundreds of international construction arbitrations 300 cases in addition to several hundred international commercial arbitrations It presents the results of the first and largest research to be undertaken in this area and it will be useful to arbitration practitioners and scholars and to the wider audience of dispute resolution students practitioners and theorists In turn the book examines to what extent international arbitrators apply the law as the substantive norm providing an explanation for that and then offers insights into whether arbitrators in fact lean towards commercial and transnational norms to construe the parties contract before discussing to what extent international arbitrators take into account fairness considerations to reach their decisions on the merits of the parties claims The book also examines to what extent international arbitrators apply mandatory rules of foreign law Lastly it provides insight into the effect of arbitrators background characteristics on their decisions Written for arbitration practitioners arbitrators and legal counsel and scholars the book will be useful for both experienced arbitrators and those starting their arbitration career or studying for their arbitration qualification It will also be useful for project professionals involved in contract management and dispute resolution
