System United States. Rehabilitation Services Administration,1976 **Parameter Setting** Thomas Roeper,Edwin Williams,1987-03-31 In May 1985 the University of Massachusetts held the first conference on the parameter setting model of grammar and acquisition The conference was conceived in the belief that there is a new possibility of tightly connecting grammatical studies and language acquisition studies and that this new possibility has grown out of the new generation of ideas about the relation of Universal Grammar to the grammar of particular languages The papers in this volume are all concerned in one way or another with the parametric model of grammar and with its role in explaining the acquisition of language Before summarizing the accompanying papers I would like to sketch the intellectual background of these new ideas It has long been the acknowledged goal of grammatical theorists to explicate the relation between the experience of the child and the knowledge of the adult Somehow the child selects a unique grammar by assumption compatible with a random partially unreliable sample of some language In the earliest work in generative grammar starting with Chomsky s Aspects and extending to such works as Jackendoffs Lexicalist Syntax 1977 the model of this account was the formal evaluation metric accompanied by a general rule writing system The model of acquisition was the following the child composed a grammar by writing rules in the rule writing system under the constraint that the rules must be compatible with the data and that the grammar must be the one most highly valued by the evaluation metric **Case Studies of Linguistic**
