Albert Weideman,2016-09-05 No mere history of applied linguistics this volume presents a framework for interpreting the development of applied linguistics as a discipline It offers a systematic account of how applied linguistics has developed articulating the philosophical premises that have informed both its emergence and its subsequent growth It asks questions that are seldom asked Where does the discipline derive from Where is it heading What directions has it already taken Which direction should it embrace in future What is the relative worth of all of the variation in design and methods that have been developed by applied linguists In defining applied linguistics as a discipline of design it takes us beyond the diffuse and sometimes contradictory conventional definitions of the field The framework of design principles it proposes not only helps to explain the historical development of applied linguistics but also provides a potential justification for solutions to language problems It presents us with nothing less than an emerging theory of applied linguistics *Computer Learner Corpora, Second Language Acquisition and Foreign Language Teaching* Sylviane Granger,Joseph Hung,Stephanie

Petch-Tyson,2002-12-11 This book takes stock of current research into computer learner corpora conducted both by ELT and SLA specialists It should be of particular interest to researchers looking to assess its relevance to SLA theory and ELT practice Throughout the volume emphasis is also placed on practical methodological aspects of computer learner corpus research in particular the contribution of technology to the research process The advantages and disadvantages of automated and semi automated approaches are analyzed the capabilities of linguistic software tools investigated the corpora and compilation processes described in detail In this way an important function of the volume is to give practical insight to researchers who may be considering compiling a corpus of learner data or embarking on learner corpus research The volume is divided into three main sections Section 1 gives a general overview of learner corpus research Section 2 illustrates a range of corpus based approaches to interlanguage analysis Section 3 demonstrates the direct pedagogical relevance of learner corpus work *Theory Construction in Second Language Acquisition* Geoff Jordan,2004-02-04 Recently many SLA

researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist

scientific endeavour The resulting epistemological arguments plus problems of theory proliferation contradicting theories and theory domain hinder progress towards a unified theory of SLA Theory Construction in SLA addresses these problems by returning to first principles it asks whether there is such a thing as reliable knowledge what is special about scientific method and how we can best explain SLA It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA Part One explores the central issues in the philosophy of science defends rationality against relativists and offers Guidelines for theory assessment Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines **The Routledge**
