Economics with Heterogeneous Interacting Agents Alessandro Caiani, Alberto Russo, Antonio Palestrini, Mauro Gallegati, 2016-09-21 This book offers a practical guide to Agent Based economic modeling, adopting a learning by doing approach to help the reader master the fundamental tools needed to create and analyze Agent Based models. After providing them with a basic toolkit for Agent Based modeling, it presents and discusses didactic models of real financial and economic systems in detail. While stressing the main features and advantages of the bottom-up perspective inherent to this approach, the book also highlights the logic and practical steps that characterize the model building procedure. A detailed description of the underlying codes developed using R and C is also provided. In addition, each didactic model is accompanied by exercises and applications designed to promote active learning on the part of the reader. Following the same approach, the book also presents several complementary tools required for the analysis and validation of the models, such as sensitivity experiments, calibration exercises, economic network, and statistical distributions analysis. By the end of the book, the reader will have gained a deeper understanding of the Agent Based methodology and be prepared to use the fundamental techniques required to start developing their own economic models. Accordingly, *Economics with Heterogeneous Interacting Agents* will be of particular interest to graduate and postgraduate students as well as to academic institutions and lecturers interested in including an overview of the AB approach to economic modeling in their courses.

Sovereign Wealth Funds Reduce Fiscal Policy Pro-cyclicality? New Evidence Using a Non-Parametric Approach Ali Al-Sadiq,Mr. Ali J Al-Sadiq,Diego Alejandro Gutiérrez,2023-06-23 The heightened volatility of commodity prices in recent years reflecting the effects of the pandemic and the war in Ukraine begs the longstanding question of the optimal fiscal policy response to commodity price shocks Fiscal performance in most commodity exporting countries is typically shaped by shifts in commodity prices and economic activity often resulting in procyclical fiscal policy One way to minimize the procyclicality of fiscal policy is to set up a stabilization Sovereign Wealth Fund SWF While such funds can help smooth government consumption in good and bad times the empirical evidence of their value so far has been inconclusive However using an unbalanced panel dataset for 182 countries during 1980 2019 with two econometric methods that address the selection bias problem we provide robust evidence that stabilization SWFs do indeed help smooth government consumption by reducing fiscal policy volatility associated with commodity price fluctuations Innovation and Market Value. The Case

of Tourism Enterprises Dawid Szutowski,2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for

tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm's innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises

A comparative analysis of Tamale, Ouagadougou, Bamenda and Bamako Christina Seeger ,2021-11-08 Smallholder farmers cultivating in West African cities often lack access to irrigation water and may use wastewater to irrigate their fields particularly in the dry season Wastewater contaminates vegetables with pathogens so that local consumers are likely to be exposed to health risks Market data on consumers actual payments for safety improved pathogen reduced vegetables are not available in West Africa as vegetables differing in safety levels are sold due to an information deficit on the consumers side at a uniform market price Certification and repeated purchase experience may reduce these information deficits For both market signals to be effective trust is required This book analyses the role of trust in explaining consumers maximum willingness to pay WTP for safe and certified safe food in a Hicksian framework This theory is tested using household data n 2 662 generated from contingent valuation surveys undertaken in Tamale Ouagadougou Bamenda and Bamako The findings show that local

consumers are willing to pay substantially higher prices 40 % to 160 % for certified safe vegetables They further suggest that trust in farmers and traders reduces WTP and trust in certifying institutions increases WTP for certified safe vegetables Most WTPs were found to be construct valid They are therefore taken as trustworthy expressions of consumers preferences for safety improved vegetables These results stress the need to introduce vegetable certification in West African cities
