McDonaldization in higher education by exploring how the application of Ritzer's four features efficiency predictability calculability and control has become commonplace This wide ranging text discusses arguments surrounding the industrialisation of higher education with case studies and contributions from a wide range of international authors Written in an accessible style Beyond McDonaldization examines questions such as Can we regain academic freedom whilst challenging the McDonaldization of thought and ideas Is a McDonaldization of every aspect of academic life inevitable Will the new focus on student experience damage young people Why is a McDonaldized education living on borrowed time Is it possible to recreate the university of the past or must we start anew Does this industrialisation meet the educational needs of developing economies This book brings international discussions on the changing world of higher education and the theory of McDonaldization together seeking to provide a positive future vision of higher education Analysing and situating the discussion of higher education within a wider social political and cultural context this ground breaking text will have a popular appeal with students academics and educationalists

Handbook of Measurements Adedeji B. Badiru, LeeAnn Racz, 2018-10-08 Planning measuring and paying attention to details form the basis for all successful engineering operations Measurements pervade everything we do and must be viewed from a systems perspective A comprehensive all encompassing guide to measurements Handbook of Measurements Benchmarks for Systems Accuracy and Precision focuses on high level engineering computations essential for benchmarks and technical innovation The book uses a systems framework and a technically rigorous approach to systems linking of measurements an approach that sets it apart from other handbooks The popular saying measure twice and cut once bears out the importance of measurements in human endeavors This handbook covers both qualitative and quantitative topics of measurement It opens with a chapter on the fundamentals of measurement and includes coverage of human centric measurements such as measurement of personnel productivity and contractor performance It concludes with three appendices on measurement references conversion factors equations formulas and statistics for measurement It is well understood that humans cannot manage anything that cannot be measured All elements involved in our day to day decision making involve some form of measurement whether in the kitchen retail sports service operations geographical exploration health care delivery worker productivity clothing design engineering product design or space craft launching Measuring an attribute of a system and then analyzing it against some standard some specification some best practice or some benchmark empower a decision maker to take appropriate and timely actions This book gives you a guide for sustainable practices to ensure accurate measurements helping you make decisions backed by metrics

Understanding Learning Difficulties in Maths: Dyscalculia, Dyslexia or Dyspraxia? Judy Hornigold, 2017-10-16 Why do some pupils experience maths learning difficulties How can you determine whether there is a specific learning difficulty such as dyscalculia dyspraxia or dyslexia What teaching strategies can help overcome maths anxiety and specific maths learning difficulties Without doubt maths is one of the most important subjects taught in schools and yet it is the one subject that can strike fear and dread in children from the very start of their education In this book Judy Hornigold explores potential causes of maths learning difficulties and particularly the specific difficulties that learners with dyscalculia dyslexia and or dyspraxia experience It considers how general maths anxiety impedes mathematical development and then examines whether this or a more fundamental and specific difficulty with maths such as dyscalculia is the real root of difficulties The book then looks in detail at a wide range of strategies to help overcome general maths anxiety and more specific learning difficulties It addresses four distinct areas core number reasoning memory and visual spatial awareness as the main areas of difficulty for learners with dyscalculia core number and reasoning dyslexia memory and dyspraxia visual spatial awareness

ICTMT 2019 Sharina Osman, Ilham Sentosa, Putu Ngurah Suyatna Yasa, Mirsa Umiyati, I Gede Suranaya Pandit, 2019-08-19 The 1st International Conference on Tourism Management and Technology is motivated by improving the quality of research and development relating to tourism management and technology fields. Thus, this conference has aims: 1. to bring together the scientists, researchers, and practitioners and lecturers; 2. To share and to discuss theoretical and practical knowledge about innovation in tourism management and technology fields. The conference took place in Universiti Kuala Lumpur, Malaysia, on August 17th, 2019. There are 34 papers that participated from various topics. The conference involves tourism management and technology fields such as Media and Technology in Tourism, Innovation in Tourism, The Theoretical Perspective on Tourism, Sustainable Tourism, Gender and Diversity Issue in Tourism, Technology and Management on Tourism, Law in Tourism, Health Tourism, Tourism Policy and Planning, Tourism and Environment, Finance in Tourism. Specifically, this conference can be used as a scientific forum for accommodating discussion among young researchers that originated from Indonesia in the field of Tourism Management and Technology. Therefore, the invited speakers in this conference are the researchers that are well known and reputable in the world. We would like to thank the organizing committee and the members of reviewers for their kind assistance in reviewing the papers. We would also extend our best gratitude to keynote speakers for their invaluable contribution and worthwhile ideas shared in the conference. Furthermore, ICTMT is hoped to be able to be used as academic media to exchange ideas and as a result, it will succeed in deciding the recommendation related to the tourism management and technology phenomenon.

HCI in Mobility, Transport, and Automotive Systems. Driving Behavior, Urban and Smart Mobility Heidi Krömker, 2020-07-10 This two-volume set LNCS 12212 and 12213 constitutes the refereed proceedings of the Second International Conference on HCI in Mobility, Transport, and Automotive Systems, MobiTAS 2020, held as part of the 22nd International Conference on Human Computer Interaction, HCII 2020, in Copenhagen, Denmark, in July 2020. A total of 1439 full papers and 238 posters have been carefully reviewed and accepted for publication in HCII 2020. The papers cover the entire field of human computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. MobiTAS 2020 includes a total of 59 papers, and they are organized in the following topical sections: Part I: Automated Driving and In-Vehicle Experience Design; UX topics in automated driving and designing in vehicle experiences; Part II: Driving Behavior, Urban and Smart Mobility studies on driving behavior and urban and smart mobility. The conference was held virtually due to the COVID-19 pandemic.

Teaching and Time Poverty Greg Thompson, Anna Hogan, 2024-12-04 As teacher shortages reach a global crisis point, this book explores how time poverty has become a critical factor in the working lives of teachers and school leaders. Arguing that we need to move away from framing the problem of teachers' work as simply workload, this book suggests that understanding time

poverty is the first step in moving toward more manageable working lives The book brings together international perspectives on teacher time poverty drawing on theoretical and empirical work to underscore the growing complexity of teachers work and how this impacts job satisfaction stress and feeling that there is never enough time to accomplish all that needs to be done Many policy solutions misdiagnose the problems of teachers work simply suggesting it is an issue of workload The chapters investigate issues of work intensification finding that teachers are not only working longer but also working harder as they manage more complex classrooms and policy mandates This book is essential reading for those interested in understanding how current education policy both produces time poverty and could better identify and respond to the complexities of teachers work

Conservative Government Penal Policy 2015-2021 Christopher David Skynns,2022-07-28 This book interrogates Conservative government penal policy for adult and young adult offenders in England and Wales between 2015 and 2021 Government penal policy is shown to have been often ineffective and costly and to have revived efforts to push the system towards a disastrous combination of austerity outsourcing and punishment that has exacerbated the penal crisis This investigation has meant touching on topical debates dealing with the impact of resource scarcity on offenders experiences of the penal system the impact of an increasing emphasis on punishment on offenders sense of justice and fairness the balance struck between infection control and offender welfare during the government handling of the SARS CoV 2 pandemic and why successive Conservative governments have intransigently pursued a penal policy that has proved crisis exacerbating The overall conclusion reached is that penal policy is too important to be left to governments alone and needs to be recalibrated by a one off inquiry complemented by an on going advisory body capable of requiring governments to explain or change The book is distinctive in that it provides a critical review of penal policy change whilst combining this with insights derived from the sociological analysis of penal trends

Prestressed Members with External Fiber-Reinforced Polymer (FRP) Tendons Tiejiong Lou,Yanan Wu,Sergio M.R. Lopes,2025-02-03 Prestressed Members with External Fiber Reinforced Polymer FRP Tendons Design Assessment and Modelling provides an overview of using FRPs including how to predict the short term and long term behavior of externally prestressed concrete or steel concrete composite members their second order effects and how to examine the effectiveness of using FRP tendons instead of steel tendons for external prestressing As external prestressing is considered to be one of the most powerful techniques in strengthening of existing structures this book provides a comprehensive resource on the topics covered The conventional use of prestressing steel is however naturally

prone to corrosion The best strategy to solve completely the corrosion problem is the use of nonmetal materials instead of prestressing steel Fiber reinforced polymer FRP composites are ideal materials used for external tendons for their excellent corrosion resistance high strength and low weight Covers the use of FRP tendons when compared to those with external steel tendons including key design issues Addresses important topics in the field including the second order effects of immediate and sustained loads Examines the stress in external tendons moment redistribution linear transformation of external cables and prestress secondary moments Covers long term deformation prediction World Economic Outlook, April 2016 International Monetary Fund. Research Dept.,2016-04-12 Major macroeconomic realignments are affecting prospects differentially across the world s countries and regions The April 2016 WEO examines the causes and implications of these realignments including the slowdown and rebalancing in China a further decline in commodity prices a related slowdown in investment and trade and declining capital flows to emerging market and developing economies which are generating substantial uncertainty and affecting the outlook for the global economy Additionally analytical chapters examine the slowdown in capital flows to emerging market economies since their 2010 peak its main characteristics how it compares with past slowdowns the factors that are driving it and whether exchange rate flexibility has changed the dynamics of the capital inflow cycle and assess whether product and labor market reforms can improve the economic outlook in advanced economies looking at the recent evolution and scope for further reform the channels through which reforms affect economic activity under strong versus weak economic conditions reforms short to medium term macroeconomic effects and sequencing of reforms and coordination with other policies to maximize their potential quantitative economic benefits A special feature analyzes in depth the energy transition in an era of low fossil fuel prices
