Title Intermolecular And Surface Forces Third Edition:

Intermolecular and Surface Forces Jacob N. Israelachvili, 2011-07-22 Intermolecular and Surface Forces describes the role of various intermolecular and interparticle forces in determining the properties of simple systems such as gases liquids and solids with a special focus on more complex colloidal polymeric and biological systems The book provides a thorough foundation in theories and concepts of intermolecular forces allowing researchers and students to recognize which forces are important in any particular system as well as how to control these forces This third edition is expanded into three sections and contains five new chapters over the previous edition Starts from the basics and builds up to more complex systems Covers all aspects of intermolecular and interparticle forces both at the fundamental and applied levels Multidisciplinary approach bringing together and unifying phenomena from different fields This new edition has an expanded Part III and new chapters on non equilibrium dynamic interactions and tribology friction forces Food Lipids Casimir C. Akoh, David B. Min, 2008-03-17 Maintaining the high standards that made the previous editions such well respected and widely used references Food Lipids Chemistry Nutrition and Biotechnology Third Edition tightens its focus to emphasize lipids from the point of entry into the food supply and highlights recent findings regarding antioxidants and lipid oxidation Always representative of the current state of lipid science this edition provides four new chapters reflecting the latest advances in antioxidant research New chapters include Polyunsaturated Lipid Oxidation in Aqueous Systems Tocopherol Stability and the Prooxidant Mechanisms of Oxidized Tocopherols in Lipids Effects and Mechanisms of Minor Compounds in Oil on Lipid Oxidation and Total Antioxidant Evaluation and Synergism The most comprehensive and relevant treatment of food lipids available this book highlights the role of dietary fats in foods human health and disease Divided into five parts it begins with the chemistry and properties of food lipids covering nomenclature and classification extraction and analysis and chemistry and function Part II addresses processing techniques including recovery refining converting and stabilizing as well as chemical interesterification The third Part has been renamed and expanded to honor the growing data on oxidation and antioxidants Part IV explores the myriad interactions of lipids in nutrition and health with information on heart disease obesity and cancer and Part V continues with contributions on biotechnology and biochemistry including a chapter on the genetic engineering of crops that produce vegetable oil Revised and updated with new information and references throughout the text this third edition of a bestselling industry standard once again draws on the contributions of leading international experts to establish the latest benchmark in the field and provide the platform from which to further advance lipid science **Nanotechnology** Ben Rogers, Jesse Adams, Sumita Pennathur, 2014-10-28 An Accessible Scientifically Rigorous Presentation That Helps Your Students Learn the Real Stuff Winner of a CHOICE Outstanding Academic Book Award 2011 takes the revolutionary concepts and techniques that have traditionally been fodder for graduate study and makes them accessible for all outstanding introduction to the broad field of nanotech Principles of Colloid and Surface
