Ellestad's Stress Testing Gregory S. Thomas, L. Samuel Wann, Myrvin H. Ellestad, 2018-10-26 The sixth edition of Ellestad's classic text on cardiac stress testing has been extensively updated and re-written to communicate contemporary understanding of the classical principles of stress testing to clinicians and researchers, students and seasoned practitioners alike. The current techniques for performing stress tests presented herein reflect major technologic advances in imaging, physiologic monitoring and the assessment of cardiovascular risk, addressing fundamental paradigm shifts in interventional surgical and medical treatment of heart disease. Moreover, the text addresses the dramatic changes that are occurring in patient demographics and the environmental socioeconomic, gender and genomic factors that crucially impact heart disease and warrant attention when performing cardiac stress testing. Chapters on the physiology of exercise testing, including practical details regarding protocols for conducting the stress test, proper supervision, important parameters to be monitored and the diagnostic and prognostic information to be gleaned from the electrocardiogram, set the stage for expanded chapters on the use of cardiac imaging in conjunction with stress testing. Physiologic and metabolic considerations during stress testing are covered in detail. Application of stress testing to special populations such as women, children, athletes and individuals in both high and low risk groups are covered in new chapters. Finally, the authors address the use of stress testing in limited resource environments and discuss global changes in the incidence of atherosclerosis and suggest how stress testing may evolve.

Weapons and the Law of Armed Conflict William H. Boothby, 2016-03-10 Bringing together the law of armed conflict governing the use of weapons into a single volume, the fully updated Second Edition of *Weapons and the Law of Armed Conflict* interprets these rules and discusses the factors influencing future developments in weapons law. After relating the historical evolution of weapons law, the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons. The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters. Having stated the law as it is, the book then explores the way in which this dynamic field of international law develops in the light of various influences. The legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established. Having stated the law as it is, the book then investigates the way in which this dynamic field of international law develops in the light of various influences. In the final chapter, the prospects for future rule change are considered. This Second Edition includes a discussion of new treaty law on expanding bullets, the arms trade and norms in relation to biological and chemical weapons. It also analyses the International Manuals on air and missile warfare law and on cyber warfare law, the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications, otherwise known as cyber activities.

Teaching and Learning with Digital Technologies in Higher Education Institutions in Africa Admire Mare, Erisher Woyo, Elina M. Amadhila, 2022-12-09 This book critically examines how the COVID-19 pandemic has stimulated

digital innovation within higher education using case studies from Africa Imagining a future for post pandemic higher education it analyses the challenges and opportunities of remote teaching and learning The book explores the structural barriers around access to higher education and how these were reconfigured and amplified by technology dependent teaching and learning Case studies from countries across Africa provide unique insights into the challenges experienced by Higher Education Institutions HEIs during the COVID 19 pandemic examining examples of emergent pedagogies such as online mobile and social media enhanced teaching and blended learning The chapters consider online assessment and teacher professional development critically examining some of the benefits and structural challenges of digital technology integration in the context of pre existing education disparities such as students and teachers living in poverty stricken and highly unequal societies Offering invaluable insights into higher education in Africa the book will be essential reading for researchers scholars and students in the fields of higher education study digital education and educational technology and African and comparative education It will also be of interest to higher education managers and policymakers **Monthly Catalog of United States Government Publications** ,1990 **War and the Politics of Ethics** Maja Zehfuss,2018-02-02 Contemporary Western war is represented as enacting the West s ability and responsibility to help make the world a better place for others in particular to protect them from oppression and serious human rights abuses That is war has become permissible again indeed even required as ethical war At the same time however Western war kills and destroys This creates a paradox Western war risks killing those it proposes to protect This book examines how we have responded to this dilemma and challenges the vision of ethical war itself exploring how the commitment to ethics shapes the practice of war and indeed how practices come in turn to shape what is considered ethical in war The book closely examines particular practices of warfare such as targeting the use of cultural knowledge and ethics training for soldiers What emerges is that instead of constraining violence the commitment to ethics enables and enhances it The book argues that the production of ethical war relies on an impossible but obscured separation between ethics and politics that is the problematic politics of ethics and reflects on the need to make decisions at the limit of ethics *Monthly Catalogue, United States Public Documents* ,1995
