Taylor Lauritsen,2021-04-19 This book explores the manner in which architectural settings and action contexts influenced the perception of decoration in the Roman world Crucial to the relationship between ancient viewers and media was the concept of decor a term employed by Vitruvius and other Roman authors to describe the appropriateness of particular decorative elements to the environment in which they were located The papers in this volume examine a diverse range of decorated spaces from press rooms to synagogues through the lens of decor In doing so they shed new light on the decorative principles employed across Roman Italy and beyond      Directions in Sign Language Acquisition Gary Morgan,Bencie Woll,2002-01-01 This is the second volume in the series Trends in language acquisition research The unusual combination in one volume of reports on various different sign languages in acquisition makes this book quite unique      *A Matter of Complexity* Roland Pfau,Markus Steinbach,Annika Herrmann,2016-03-07 Since natural languages exist in two different modalities the visual gestural modality of sign languages and the auditory oral modality of spoken languages it is obvious that all fields of research in modern linguistics will benefit from research on sign languages Although previous studies have provided important insights into a wide range of phenomena of sign languages there are still many aspects of sign languages that have not yet been investigated thoroughly The structure of subordinated clauses is a case in point The study of these complex syntactic structures in the visual gestural modality adds to our understanding of linguistic variation in the domain of subordination Moreover it offers new empirical and theoretical evidence concerning possible structures and functions of subordination in natural languages And last but not least it answers the question to what extent the corresponding morphosyntactic and prosodic strategies depend on the modality of articulation and perception This volume represents the first collection of papers by leading experts in the field investigating topics that go beyond the analysis of simple clauses It thus contributes in innovative ways to recent debates about syntax prosody semantics discourse structure

Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together Rather than investigate architecture s relations to the weather in isolation they are integrated into a wider discussion of cultural and social influences on architecture The analysis of weather s effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts sciences and society leading to a critical re evaluation of contemporary responses to climate change *Variation in Indonesian Sign Language* Nick Palfreyman,2019-01-29 This pioneering work on Indonesian Sign Language BISINDO explores the linguistic and social factors that lie behind variation in the grammatical domains of negation and completion Using a corpus of spontaneous data from signers in the cities of Solo and Makassar Palfreyman applies an innovative blend of methods from
