**Signals and Systems** Oktay Alkin, 2016-04-19 Drawing on the author's 25 years of teaching experience *Signals and Systems A MATLAB Integrated Approach* presents a novel and comprehensive approach to understanding signals and systems theory Many texts use MATLAB as a computational tool but Alkin's text employs MATLAB both computationally and pedagogically to provide interactive visual reinforcement  
*Radar Systems Analysis and Design Using MATLAB Second Edition* Bassem R. Mahafza, 2005-03-09 An introduction to radar systems should ideally be self contained and hands on a combination lacking in most radar texts The first edition of *Radar Systems Analysis and Design Using MATLAB* provided such an approach and the second edition continues in the same vein This edition has been updated expanded and reorganized to include advances in the field and to be more logical in sequence Ideal for anyone encountering the topic for the first time or for professionals in need of on the job reference this book features an abundance of MATLAB programs and code *Radar Systems Analysis and Design Using MATLAB Second Edition* presents the fundamentals and principles of radar along with enough rigorous mathematical derivations to ensure that you gain a deep understanding The author has extensively revised chapters on radar cross section and polarization matched filter and radar ambiguity function and radar wave propagation He also added information on topics such as PRN codes multipath and refraction clutter and MTI processing and high range resolution With all MATLAB functions updated to reflect version 7.0 and an expanded set of self test problems you will find this up to date text to be the most complete treatment of radar available providing the hands on tools that will enrich your learning

**Radar Signal Analysis and Processing Using MATLAB** Bassem R. Mahafza, 2016-04-19 Offering radar related software for the analysis and design of radar waveform and signal processing *Radar Signal Analysis and Processing Using MATLAB* provides a comprehensive source of theoretical and practical information on radar signals signal analysis and radar signal processing with companion MATLAB code Aft *Analog and*

*Digital Signals and Systems* R. K. Rao Yarlagadda, 2010-08-05 This book presents a systematic comprehensive treatment of analog and discrete signal analysis and synthesis and an introduction to analog communication theory This evolved from my 40 years of teaching at Oklahoma State University OSU It is based on three courses Signal Analysis a second semester junior level course Active Filters a first semester senior level course and Digital signal processing a second semester senior level course I have taught these courses a number of times using this material along with existing texts The references for the books and journals over 160 references are listed in the bibliography section At the undergraduate level most signal analysis courses do not require probability theory Only a very small portion of this topic is included here I emphasized the basics in the book with simple mathematics and the sophistication is minimal Theorem proof type of material is not emphasized The book uses the following model 1 Learn basics 2 Check the work using bench marks 3 Use software to see if the results are accurate The book provides detailed examples over 400 with applications A three number system is used consisting of chapter number section number example or problem number thus allowing the student to quickly identify the related material in the appropriate section of the book The book includes well over 400 homework problems Problem numbers are identified using the above three number system

*Radar Systems Analysis and Design Using MATLAB* Bassem R. Mahafza, 2016-04-19 Developed from the author's graduate level courses the first edition of this book filled the need for a comprehensive self contained and hands on treatment of radar systems analysis and design It quickly became a bestseller and was widely adopted by many professors The second edition built on this successful format by rearranging and updating
