Remote Alarm Indicators and Test Stations

Introduction

Operation. Simplex® air duct smoke detector housings provide a TrueAlarm smoke detector for monitoring air conditioning or ventilating ducts. Sampling tubes are installed into the duct allowing air to be directed to the smoke detector mounted in the housing. These duct detector housings with smoke detectors are compatible with Simplex fire alarm control panels that provide conventional two-wire or four-wire initiating device circuits (IDCs).

Model Details

Each supports a remote red alarm LED or a remote test station with LED(s). Models with relay output provide relay coil wiring supervision that will transfer a trouble to the IDC if supervision is lost.

2-Wire Model 4098-9685 provides basic smoke detection for applications that do not require a remote relay. Power is from the IDC.

2-Wire Model 4098-9688 provides a supervised relay output for connection to a single 4098-9841 relay. This model is powered from the IDC and requires connection as the only device to ensure relay operation.

4-Wire Model 4098-9686 provides a supervised relay control output that can control up to 15, 4098-9843 control relays. Relay supervision troubles are indicated by a yellow LED on the interface board. (Resettable 24 VDC is required, see page 4.) Remote test station 4098-9835 is available for use with this model to provide a test keyswitch, a red LED alarm indicator and a green power-on LED.
