IPDS 2006 Integrated Powertrain and Driveline Systems 2006 IMechE, 2006-06-12. The holistic view of powertrain development that includes engine, transmission and driveline is now well accepted. Current trends indicate an increasing range of engines and transmissions in the future with consequently a greater diversity of combinations. Coupled with the increasing introduction of hybrid vehicles, the scope for research, novel developments and new products is clear. This volume presents a collection of papers from the Institution of Mechanical Engineers Conference Integrated Powertrain and Driveline Systems 2006, IPDS 2006, organised by the IMechE Automobile Division. Main themes include transmissions concept to market evolution, powertrain integration and engine integration. Novel concepts relating for example to continuously variable transmissions, CVTs and hybridization are discussed as well as approaches to modelling and simulation. The main themes include transmissions concept to market evolution and powertrain evolution. Discusses concepts relating to continuously variable transmissions and hybridization.

Hydrogen and Fuel Cells Bent Sorensen, Giuseppe Spazzafumo, 2018-02-10. In a multidisciplinary field such as energy, Hydrogen and Fuel Cells stands out by covering the entire width of hydrogen production and usage technologies, giving detailed descriptions of not just one but the range of very different fuel cells that have been developed or are under development. In one volume, respected experts Bent Sorensen and Giuseppe Spazzafumo provide all the basic scientific theory underlying hydrogen and fuel cell technologies but at the same time present applications and sustainable integration into society in a way accessible to a broad range of people working in this field, whether in technical, economic or management roles. The third edition reflects both recently emerged technologies and the market penetration of the most promising technologies and it gives an appraisal of how far fuel cell technology may go in the future, considering current challenges and economic trends. This new edition has updated and expanded content on hydrogen storage and transmission, molten carbonate fuel cells, PEM fuel cells, solid oxide fuel cells, biofuel cells including microbial fuel cells, applications in transportation and power plants, future scenarios and life cycle assessment. It is ideal for researchers and professionals in the field of energy and renewable energy, in particular both in academia and industry. It is also useful to lecturers and graduate students in engineering, physics and environmental sciences as well as professionals involved in energy or environmental regulation and policy. Gain thorough understanding of the science and applications of hydrogen and a range of different fuel cells, including economic and social aspects of the field. Updated sections include hydrogen storage and transportation, biofuel cells, PEM and solid oxide fuel cells, applications in transportation and large scale power generation and life cycle assessment.
