

SIMILES

Today I'm feeling as fresh as a daisy.

John runs as fast as lightning.

My best friend is as stubborn as a mule.

After that meal, I feel as fat as a pig!

My little sister works as slow as a turtle.

Without my glasses, I am as blind as a bat.

That boy in my class is as funny as a clown.

Right now, I'm feeling as sick as a dog.

Have you ever felt as happy as a hippo?

When she kissed me I turned as red as a tomato.

Metaphor, Riddles, and the Origin of Language Marcel Danesi, 2024-04-08 Scientific evidence for the origin of speech is abundant but evidence for the origin of language as separate from speech as a naming system remains speculative What evidence can be utilized that will furnish relevant insights on the origin of language This book attempts to provide an answer by suggesting that the first riddles of humanity along with the first myths reveal that language may have emerged as a mode of reflection via metaphor a mode that involves blending speech forms together to produce complex abstract cognition

Image and Concept Olga Freidenberg, 2006-03-07 First published in 1997 *Image and Concept* Mythopoetic Roots of Literature here finally available in English is devoted to the origins of Greek tragedy In it Freidenberg develops the notion that it was the very transition from thinking based on mythological images to the kind of thinking that makes use of formal logical concepts that resulted in the appearance of literature With the transition from mythological thinking to conceptual thought the content of mythological images became the texture of the new concepts The inherited mythological forms now were reinterpreted conceptually causalized ethicized generalized abstracted This reinterpretation in turn brought about poetic figurality Folkloric material began to be differentiated from the mythological images of the past into various disciplines such as religion philosophy ethics literature and art Yet differentiated and reinterpreted as it was the folkloric material remained formally preserved in poetic image structure and plot

Descriptive Writing, Grades 3-5 (Meeting Writing Standards Series) Kimberly A. Williams, 2000-06

Motives for Metaphor in Scientific and Technical Communication Timothy Giles, Charles Sides, 2017-03-02 Examination of the work of scientific icons Newton Descartes and others reveals the metaphors and analogies that directed their research and explain their discoveries Today scientists tend to balk at the idea of their writing as rhetorical much less metaphorical How did this schism over metaphor occur in the scientific community To establish that scientists should use metaphors to explain science to the public and need to be conscious of how metaphor can be useful to their research this book examines the controversy over cloning and the lack of a metaphor to explain it to a public fearful of science s power The disjunction between metaphor and science is traced to the dispensation of the Solar System Analogy in favor of a mathematical model Arguing that mathematics is metaphorical the author supports the idea of all language as metaphorical unlike many rhetoricians and philosophers of science who have proclaimed all language as metaphorical but have allowed a distinction between a metaphorical use of language and a literal use For technical communication pedagogy the implications of this study suggest foregrounding metaphor in textbooks and in the classroom Though many technical communication textbooks recommend metaphor as a rhetorical strategy some advise avoiding it and those that recommend it usually do so in a paragraph or two with little direction for students on how to recognize metaphors or to how use them This book provides the impetus for a change in the pedagogical approach to metaphor as a rhetorical tool with epistemological significance

Katz, 2018-10-24 Research on metaphor has been dominated by Aristotelian questions of processes in metaphor understanding Although this area is important it leaves unasked Platonic questions of how structures of the mind affect such processes Moreover there has been relatively little work on how metaphors affect human behavior Although there are numerous postdictive or speculative accounts of the power of metaphors to affect human behavior in particular areas such as clinical or political arenas empirical verification of these accounts has been sparse To fill this void the editors have compiled this work dedicated to empirical examination of how metaphors affect human behavior and understanding The book is divided into four sections metaphor and pragmatics clinical uses of metaphor metaphor and politics and other applications of metaphor Chapters contained within these sections attempt to merge Aristotelian questions with Platonic ones
