Description

Simplex Synchronous Clocks can be used in all types of applications, from small offices to large-scale industrial sites. Round clocks are available in 12", and 16" sizes. Square clocks are also available at 12".

Each synchronous clock uses a stepped second hand and provides these capabilities:

Hourly correction. Clocks are automatically synchronized with the Simplex Time Control Center every hour. This means clocks will display the correct system time after less than 59 minutes of power failure. Clocks that are up to 59 minutes slow or 55 seconds fast are corrected completely on the hour.

12-hour correction. Synchronization is provided for clocks that are up to 12 hours slow. This ensures that even the most prolonged power interruption in individual clocks, or in the complete system, will be compensated for automatically. Clocks that are up to 11 hours and 59 minutes slow are corrected every 12 hours.
