Parents of Invention Christopher Brown-Syed, 2011-06-07 This fascinating tale of the rise and fall of mini-computer based integrated library systems (ILS) offers both an explanation of the technical workings still being used daily and a historical investigation. *Parents of Invention: The Development of Library Automation Systems in the Late 20th Century* traces the rise and fall of mini-computer based ILS. In doing so, it offers an insider's view of the process of creation, the technical challenges, and the lasting contributions of librarians and programmers at a time when librarians and their automation needs forced computer companies to innovate. Organized around a series of interviews with computer programmers, librarians, and salespeople, the book discusses developments from the late 1970s to the mid 1990s, focusing on the 1980s when both ILS and the mini-computer were dominant. It documents the time when a small group of computing vendors joined with large libraries
