Levack,1992 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company Food for Thought Justin Amery,2022-03-02 Everything that exists exists against a background All of our experiences beliefs and understandings of health practice derive from a living organic and constantly moving context whether scientific philosophical cultural aesthetic biological or spiritual It is useful therefore to spend a little time understanding and reflecting on these building blocks of who we are As practitioners we don t always have time to do this A little luxury not essential but hopefully a bit nourishing Like a fireside cup of cocoa Justin Amery This extraordinary new series fills a void in practitioner development and well being The books take a reflective step back from the tick box target driven and increasingly regulated world of 21st century health practice and invite us to revisit what health and health practice actually are Building carefully on the science and philosophy of health each book addresses the messy complex and often chaotic world of real life health practice and offers an ancient but now almost revolutionary understanding for students and experienced practitioners alike that health practice is a fundamentally creative and compassionate activity The series as a whole helps practitioners to

redefine and recreate their daily practice in ways that are healthier for both patients and practitioners The books provide a welcome antidote to demoralisation and burn out amongst practitioners reversing cynicism and reviving our feeling of pride in and our understanding of health practice By observing practice life through different lenses they encourage the development of efficiency effectiveness and above all satisfaction The fifth book in this series The Integrated Practitioner Food for Thought written for readers who prefer a more academic and reflective understanding of the themes of books 1 4
