Fair Shake Naomi Cahn,June Carbone,Nancy Levit,2025-08-05 A stirring comprehensive look at the state of women in the workforce why women s progress has stalled how our economy fosters unproductive competition and how we can fix the system that holds women back In an era of supposed equality women are falling behind in the workplace

faster than before a trend exacerbated by Covid 19 Even with more women in the workforce than in decades past wage gaps continue to increase It is the most educated women who have fallen the furthest from behind Blue collar women hold the most insecure and badly paid jobs in our economy And even as we celebrate high profile representation women on the board of Fortune 500 companies and our first female vice president women have limited recourse when they experience harassment and discrimination Fair Shake Women and the Fight to Build a Just Economy explains that the system that governs our economy a winner take all economy is the root cause of these myriad problems The WTA self selects aggressive cutthroat business tactics which creates a feedback loop that sidelines women The authors three legal scholars call this feedback loop the triple bind if women don't compete on the same terms as men they lose if women do compete on the same terms as men they're punished more harshly for their sharp elbows or actual misdeeds and when women see that they can't win on the same terms as men they take themselves out of the game as if they haven't been pushed out already With odds like these stacked against them it's no wonder women feel like no matter how hard they work they can't get ahead Drawing on rich storytelling often found in legal documents Fair Shake makes a compelling case for why existing laws fail to protect women It not only diagnoses the problem of what's wrong with the modern economy but shows how with awareness and collective action we can build a truly just economy for all

Schram,Joseph A. Schwartz,Stephen G. Tibbetts,2023-10-24 If you are considering a career in any

aspect of criminal justice and you want to know more about the motivations and socio psychological makeup of serious offenders then this book is for you Introduction to Criminology Why Do They Do It applies the dominant theories in the existing criminological literature as to why people commit crimes In addition we examine many recent as well as many hypothetical examples of serious crimes and we demonstrate applications of theory as to why the offenders did what they did While other textbooks do a decent job in discussing the basic theories as well as exploring the various types of crime our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity This is extremely important because most instructors never get to the latter typology chapters in a given semester or term So our approach is to incorporate them into the theoretical chapters in which they apply directly to the theories presented Our specific examples and true stories such as notable serial killings and other recent crimes in each chapter as well as our use of established theoretical models to explain the offenses is another primary distinction of this book Obviously this book is meant to be central to an introductory course in criminology but due to the emphasis on applied theoretical explanations it is also appropriate for higher level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice In it we have integrated true crimes and some hypothetical examples both on a general level such as in the Applying Crime to Theory sections and more specifically in the Why Do They Do It sections which often involve serial killings mass murderers or other notorious examples of offenders offending The subtitle of our book Why Do They Do It relates to our theme Our goal in writing this book was to apply established theories of crime which are often seen as abstract and hypothetical to real crimes that have occurred as well as to hypothetical ones that are quite likely to occur To this end we explore the various reasons for offending or the why they do it in various cases from the first documented serial killers in the United States the Harpe Brothers in the late 18th century to California cop killer spree killer Christopher Dorner in 2013 and then Payton S Gendron who massacred 10 Black shoppers at a grocery store in Buffalo New York in 2022 Importantly throughout these discussions of actual crimes we will apply theories As you will see some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well Unlike other authors in this field we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter We strongly believe that by integrating discussions of such serious crimes all crimes previously identified by the FBI as Index or Part I offenses including murder rape robbery aggravated assault burglary motor vehicle theft larceny and arson as well as other crimes such as simple assault and driving under the influence into the theoretical chapters provides the best exploration of why people commit such offenses And the flip side is good as well by discussing offenses together with theories we show you how to apply theories toward explaining other instances of criminal behavior Again this goes back to our theme of why do they do it It demonstrates our goal Apply the appropriate theories for the specific crime
