

Auto Pistol Model P 38 Cal. 9 mm Parabellum

General Data

Overall Length	214 mm = 8 1/2"
Length of Barrel	123 mm = 4 7/8"
Height of Pistol	136 mm = 5 1/4"
Total Weight	700 g = 27 1/2 ozs.
Magazine capacity	8 Cartridges
Standard Finish	en Blau Matted

The pistol can be supplied, upon request, in a polished and blued finish.

A spare magazine, a cleaning rod, and a test case are supplied with every pistol. The complete equipment also includes a technical demonstration card is delivered in a paper carton.

The pistol P 38 has an external hammer. The construction of a perfect hammer design, made evident in the WALTHER self-loading pistols having an external hammer, and the constant readiness of a revolver makes the enormous advantages of these weapons abundantly manifest.

The P 38 is a double action, locked breech, semi automatic pistol. It is fitted with an external hammer which is connected to a tension trigger and which has a distinctive pressure point. The P 38, like the models PP and PPK, may be fired by merely pulling the trigger. It does, moreover, readily be turned locked and unloaded.

Cartridges with faulty primer caps can be fired by pulling the trigger repeatedly.

A bulge in the barrel is caused by some irregular agency - will not impede the functioning of the P 38, since the barrel is mounted in an open and unobstructed manner. The pistol is thus always ready for instant use.

National Crime Information Center operating manual, 1970 **Labour Gazette** Great Britain Department of Employment, 1928 **Wireless Sensor and Actor Networks** Luis Orozco-Barbosa, Teresa Olivares, Rafael Casado, Aurelio Bermúdez, 2007-09-19 This book presents the proceedings of the first IFIP WG 6.8 conference on Wireless Sensor and Actor Networks held in Albacete Spain. The papers selected to be included in this volume illustrate the state of the art and current trends in the area of wireless sensor and actor networks. The comprehensive program was organized into eight topics: Actors, Applications, Security, Energy, Quality of Service, Localization, Middleware, Protocols. **Viability and Sustainability of Small-Scale Fisheries in Latin America and The Caribbean** Silvia Salas, María José Barragán-Paladines, Ratana Chuenpagdee, 2018-06-07 One of the main goals in fisheries governance is to promote viability and sustainability in small scale fishing communities. This is not an easy task given external and internal pressure including environmental change and competition with other economic sectors searching for development in the coastal region. A comprehensive understanding of small scale fisheries in their own context and from a regional perspective is an important step in supporting the implementation of the Voluntary Guidelines on Securing Sustainable Small Scale Fisheries (SSF Guidelines). This book contributes to the global effort by offering knowledge, insights and lessons about small scale fisheries in Latin America and the Caribbean. The 20 case studies included in the book make explicit the various dimensions that are intrinsic to small scale fisheries in the region and identify conditions and situations that affect the wellbeing of fishing communities. The book offers insights regarding the challenges faced by small scale fisheries in the region and aligning with the objectives of the SSF Guidelines provides lessons and experiences about how to make small scale fishing communities viable while maintaining sustainable fisheries. This important book illustrates the complexity, diversity and dynamics of small scale fisheries in the Latin American and Caribbean region and presents experiences, tools and approaches to lead towards sustainable and viable fisheries. The reader will gain a new understanding on the range of actions, approaches and information needed for their successful management. John F. Caddy, International Fisheries Expert. This book prepared by the Too Big To Ignore partnership constitutes a very valuable resource for policy makers, fisheries scientists, non-governmental organizations, civil society organizations and fishing communities interested in putting in place sound management strategies, research and actions to contribute to the sustainability of small scale fisheries and food security in Latin America and the Caribbean region.
