OVERVIEW

Progress at What Cost?

In 1962 people did not celebrate Earth Day or study ecology. Pesticides spewed from airplanes, covering crops, forests, and rivers. Then biologist Rachel Carson sounded the alarm. In *Silent Spring*, she explained the impact of pesticides on the earth and called readers to act before it was too late.

Society and Exploitation Through Nature Martin Phillips, Tim Mighall, 2014-06-06 Society and Exploitation Through Nature offers an integrated approach to the environment linking the philosophical social and physical sciences to environmental problems and issues The text covers three main themes exploitation of nature and society the limits of exploitation through sustainability

and managing environmental problems These themes are illustrated throughout the book with global case studies **Gaia, Psyche and Deep Ecology** Andrew Fellows, 2019-03-04 Winner of the Scientific Medical Network Book Prize 2019 In *Gaia Psyche and Deep Ecology Navigating Climate Change in the Anthropocene* Andrew Fellows uniquely connects Earth systems Jungian and philosophical approaches to the existential threats that we face today He elucidates the psychological basis of our dysfunctional relationship with nature thereby offering a coherent framework for transforming this in our personal and professional lives Demonstrating the imperative for new ideas that transcend the status quo Fellows tackles unprecedented 21st century challenges such as climate change through his interdisciplinary approach Fellows proposes a worldview informed by depth psychology which radically contradicts the prevailing shibboleths of unlimited economic growth dominion over outer nature and negation of our inner nature To accommodate a broad readership he first introduces the Anthropocene and sufficient basics of systems dynamics Gaia theory and analytical psychology before exploring the mind matter conundrum He then correlates the structure dynamics contents and pathology of Gaia and of psyche critiques the Western Zeitgeist as midlife crisis and establishes parallels between deep ecology and psychological individuation This ground breaking synthesis of Gaia theory analytical psychology and deep ecology reveals synergies which show how we can and why we must relinquish anthropocentrism in order to survive sustainably as equals in and with the natural world Combining Jungian theory with other cutting edge disciplines to inform inspire and heal this book is essential reading not only for Jungian analysts students and scholars but for all including professionals in Earth systems science environmental philosophy and ecopsychology who realise that business as usual is no longer an option 2052 Jørgen Randers, Jorgen Randers, 2012-05-30 *What Will Our Future Look Like* We know what we want the world to be like in forty years We know what the world could be like in forty years if we all did what needs to be done to create a more sustainable future **Law and Public Policy** Kevin J. Fandl, 2018-09-03 Laws exist to incentivize us to act in a certain manner in accordance with the policies that our community has deemed right for us And when we disagree with those laws we must re examine our policies and thus our beliefs and ideas to decide whether our community has changed This is a book about law and public policy about the ideas and the rules we build to implement those rules While similar books have looked at public policy and public administration in an effort to explain how the government works and others have considered the foundations of the legal system to understand the rulemaking institutions this book takes a different approach In this ground breaking new textbook author Kevin Fandl develops a complete picture of society from idea to action by examining laws through the lens of policy and vice versa This holistic approach gives readers a chance to see not only why certain rules exist but how those rules evolved over time and the events that inspired them It offers readers an opportunity not only to see but also to participate in the process of forming the structures that shape our society This textbook is divided into two sections The first section provides readers with the tools that they will need to digest the policies and laws that surround them These tools include a

historical deep dive into the foundations of the governance structure in the United States and beyond an important examination of civics and a reminder of the importance of engaging in the policymaking process a careful breakdown of the institutions that form the backbone of the law and policy making institutions in the United States and finally critical thinking including practical tools to find reliable sources for news research and other types of information The second section of the text is comprised of subject matter analyses These subject based chapters written by experts on the topic at hand begin with a historical perspective followed by a careful examination of the key policies and laws that inform that field Each chapter highlights key vocabulary provides practical vignettes to add context to the writing explores a unique global component to compare perspectives from communities worldwide and includes a number of discussion questions and recommended readings for further examination This textbook is tailored specifically for undergraduate and graduate students of public policy to introduce them to the role of law and legal institutions as facilitators and constraints on public policy exploring those laws in a range of relevant policy contexts with the help of short case studies

Sustainability Is the New Advantage Peter McAteer, 2019-03-23 During the last 150 years we have stressed the oceans warmed the planet and overextended almost every natural resource To create real change will require a generation of leaders and businesses that think and act differently Sustainability Is the New Advantage identifies the skill sets best practices and new ideas needed to teach a new generation to start grow and manage sustainable organizations

In a Dark Wood Alston Chase, 2017-07-12 In a Dark Wood presents a history of debates among ecologists over what constitutes good forestry and a critique of the ecological reasoning behind contemporary strategies of preservation including the Endangered Species Act Chase argues that these strategies in many instances adopted for political rather than scientific reasons fail to promote biological diversity and may actually harm more creatures than they help At the same time Chase offers examples of conservation strategies that work but which are deemed politically incorrect and ignored In a Dark Wood provides the most thoughtful and complete account yet written of radical environmentalism And it challenges the fundamental but largely unexamined assumptions of preservationism such as those concerning whether there is a balance of nature whether all branches of ecology are really science and whether ecosystems exist In his new introduction Chase evaluates the response to his book and reports on recent developments in environmental science policy and politics In a Dark Wood was judged by a recent national poll to be one of the one hundred best nonfiction books written in the English language during the twentieth century A smashing good read this book will be of interest to environmentalists ecologists philosophers biologists and bio ethicists and anyone concerned about ecological issues

The Green Solution to Breast Cancer Kristen Abatsis McHenry Ph.D., 2015-09-22 This unique research based investigation of the U S breast cancer movement compares the pink and green efforts within the movement and documents their use of similar citizen science alliances despite the contention over the use of consumer based activism and pink products Breast cancer activism is one of the most flourishing research and health advocacy movements in U S

history Yet the incidence of breast cancer is continuing to increase This critical and revealing text investigates breast cancer activism in its two forms the pink movement that focuses on developing awareness of coping with and managing breast cancer and the green movement that strives to determine the possible environmental causes of breast cancer such as pesticides chemicals and water and air pollution and thereby hopes to prevent breast cancer What caused this new green movement to develop Will it replace or merge with the pink movement Does either approach offer more promise for a solution And how do the two movements differ in their positions or methodology towards a similar goal With information culled from interviews with more than 50 industry stakeholders *The Green Solution to Breast Cancer A Promise for Prevention* argues that key attributes such as strategy mission and branding have led to a greater convergence between the pink and green wings of the movement and presents information that enables readers to consider if either approach might be the shorter route to beating breast cancer
