

The background of the cover is a painting of a woman in 18th-century attire. She is wearing a dark blue dress with a white swan emblem on the bodice and a large, ornate yellow and gold striped bow on the right shoulder. She holds a white lace fan in her right hand. The scene is set in a room with a large mirror and a chandelier.

*Physics Methods in Archaeometry* M. Martini, M. Milazzo, M. Piacentini, 2006-06-15 The role of exact sciences in connection with cultural heritage now is well established and a new scientific branch has been generated Archaeometry Literally Archaeometry means measurement on ancient objects It is a multidisciplinary field of investigations where the rigorous methods of exact sciences give a fundamental contribution to solving the problems associated with conservation and restoration as well as to the study itself of the cultural heritage Archaeometry as a scientific research field involves interdisciplinary groups formed by scholars of the humanistic area together with scientists physicists chemists mathematicians biologists engineers etc The primary justification for the need of involving exact sciences in the field which in the past traditionally has been exclusive of Art Historians must no doubt be found in the conservation and restoration activities The second argument which in the public opinion justifies the involvement of science with the world of Art is the confidence that scientific methods are infallible in unmasking forgeries But in our opinion the awareness of the central role of scientific methods as a support for philological and historical investigations is still very little diffuse or at least finds it hard to become widespread Perhaps also because of our mentality Physics compared to chemistry is more apt to find applications in a context free from authentication or conservation implications

The nineteenth century witnessed an unprecedented increase in art forgery caused both by the advent of national museums and by a rapidly growing bourgeois interest in collecting objects from the past This rise had profound repercussions on notions of selfhood and national identity within and outside the realm of art Although art critics denounced forgery for its affront to artistic traditions they were fascinated by its power to shape the human and object worlds and adopted a language of art forgery to articulate a link between the making of fakes and the making of selves The Deceivers explores the intersections among artistic crime literary narrative and the definition of identity Literary texts joined more specialized artistic discourses in describing the various identities associated with art forgery the forger the copyist the art expert the dealer the restorer Built into new characters were assumptions about gender sexuality race and nationality that themselves would come to be presented in a language of artistic authenticity Aviva Briefel places special emphasis on the gendered distinction between male forgers and female copyists Copying a benign occupation when undertaken by a woman became forgery laden with criminal intent when performed by men Those who could successfully produce handle or detect spurious things and selves were distinguished from others who were incapable of distinguishing the authentic from the artistic and human forgeries Through close reading of literary narratives such as Trilby and The Marble Faun as well as newspaper accounts of forgery scandals The Deceivers reveals the identities both authentic and fake that emerged from the Victorian culture of forgery      *State Platforms of the Two Dominant Political Parties in Indiana, 1850-1900*, 1902
