**Learning to teach in post-apartheid South Africa** Yusuf Sayed, Nazir Carrim, Azeem Badroodien, Zahraa McDonald, Marcina Singh, 2018-11-28 Teacher education programmes seek to provide student teachers with the knowledge and expertise to provide quality teaching and learning in a diverse and challenging school context Learning to Teach in post apartheid South Africa Student Teachers Encounters with Initial Teacher Education addresses the complexities of teacher education programmes in preparing students to teach It adds to the knowledge about teacher education contributing critical understanding of education and the schooling system The book provides important insights to deepen researchers academics teacher education providers policy makers and students understanding of the importance to address equity redress and quality in South African education in a post apartheid era This book further helps to build student teachers capacities to work creatively and to become active and critical agents of transformation It ultimately outlines the challenges face in designing and delivering successful Initial Teacher Education programmes and the impact this has on delivering equitable and quality education

*Being a Teacher in Post-Apartheid South Africa* Yusuf Sayed, Marcina Singh, 2025-05-01 In a compelling exploration of the challenges faced by newly qualified teachers NQTs in South Africa's evolving educational landscape this book provides an empirically grounded account of their experiences Drawing on extensive research it offers a poignant narrative that seeks to illuminate the nuanced journey these educators embark upon as they transition from teacher education spaces to the complex reality of classrooms in post Apartheid South Africa The book acts as a crucial platform for the voices of NQTs shedding light on the myriad enablers and disablers they encounter during this transformative period Timely and relevant it tackles pressing questions about the readiness of teacher education to prepare students for the demands of South African schools The book charts the transition from teacher education to active teacher for NQTs The lessons distilled from this research present a clarion call for a re assessment of teacher education policies and practices This book arrives at a pivotal moment as South Africa reviews its teacher education policies With the quality of initial teacher education programmes under scrutiny the book's critiques findings and recommendations serve as indispensable tools for policymakers arguing for the need to reconceptualise South African teacher education policies As South Africa strives to avoid a cycle of developing new teachers only to lose them due to inadequate support this book seeks to support educators policymakers and all those invested in the future of South African education toward creating a more socially just education system recognising the highly unequal society in which teachers work

**Empowering Novice Academics for Student Success** Dr Johann Hugo, 2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges Student success is a burning issue both globally and locally While student achievement is determined by a combination of factors teachers and their teaching practices do matter Higher education teachers are expected to fulfil different roles at different

times such as planning for curriculum implementation mentorship and coaching facilitating learning resource development and student assessment Against this background the primary purpose of Empowering novice academics for student success Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughout Closing the Teacher Gap ,2010 Report prepared by Roli Degazon Johnson Phd Education Adviser Commonwealth Secretariat

**South African Schooling: The Enigma of Inequality** Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *The Origin and Growth of Geography as a discipline at South Africa Universities* Gustav Visser,2016-09-20 The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities The book showcases a broad and textured review of South Africa s geography departments their staff members their times and the different Geographies they engaged in The book lays the foundation from which more expansive individual

departmental histories can be written in the future

**States and the Making of Others** Jeanne Bouyat, Amandine Le Bellec, Lucas Puygrenier, 2024-06-17 This volume offers a unique interdisciplinary and comparative perspective on contemporary processes of othering by state institutions in relation to dynamics of racism xenophobia sexism homo transphobia as well as ethnic and class based discriminations It focuses on eight original case studies empirically grounded in various domains of the social state in Southern African and Western European contexts the education and health care systems the regulation of work and of procreation rights and institutions in charge of granting asylum The authors provide key insights on how states produce Others and on how othering contributes in turn to the process of state formation and the politicization of public action

Democracy and Decency Paul R. Carr, P. L. Thomas, Brad J. Porfilio, Julie A. Gorlewski, 2016-02-01 Democracy can mean a range of concepts covering everything from freedoms rights elections governments processes philosophies and a panoply of abstract and concrete notions that can be mediated by power positionality culture time and space Democracy can also be translated into brute force hegemony docility compliance and conformity as in wars will be decided on the basis of the needs of elites or major decisions about spending finite resources will be the domain of the few over the masses or people will be divided along the lines of race ethnicity class religion etc because it is advantageous for maintaining exploitative political systems in place to do so Often these frameworks are developed and reified based on the notion that elections give the right to societies or segments of societies to install regimes institutions and operating systems that are then supposedly legitimated and rendered infinitely just because formal power resides in the hands of those dominating forces This book is interested in advancing a critical analysis of the hegemonic paradigm described above one that seeks higher levels of political literacy and consciousness and one that makes the connection with education What does education have to do with democracy How does education shape influence impinge on impact negate facilitate and or change the context contours and realities of democracy How can we teach for and about democracy to alter and transform the essence of what democracy is and importantly what it should be This book advances the notion of decency in relation to democracy and is underpinned by an analysis of meaningful critically engaged education Is it enough to be kind nice generous and hopeful when we can also see signs of rampant entrenched and debilitating racism sexism poverty violence injustice war and other social inequalities If democracy is intended to be a legitimating force for good how does education inform democracy What types of knowledge experience analysis and being are helpful to bring about newer more meaningful and socially just forms of democracy Throughout some twenty chapters from a range of international scholars this book includes three sections Constructing Meanings for Democracy and Decency Justice for All as Praxis and Social Justice in Action for Democracy Decency and Diversity International Perspectives The underlying thread that is interwoven through the texts is a critical reappraisal of normative hegemonic interpretations of how power is infused into the educational realm and importantly how democracy can be re situated and re formulated so as to more meaningfully
