Having a more simplified and straightforward text material without compromising on value of content is the main aim of this book. Materials are well selected to make learning and teaching easier for the user of this book. The senior high school student is the main targeted end user of this book. However, it can also serve as a reference material for other levels of learning. The content is based on the Ghanaian and West African syllabus for senior high education. This integrated science textbook has its content organized in sections, units, and academic year. Year 1 content provides foundation tutoring. Year 2 is built on the content of year 1, likewise year 3 has its content built on that of year 2. This approach renders a vertical upward systematic approach to learning that enables the learner to build upon previous knowledge. Reference materials, tables, charts, and units are also provided to assist the learner in doing research or performing experiments. It is our hope that this textbook will satisfy teachers and learners at the senior high level of education in the area of integrated science comprising of basic biology, physics, chemistry, agriculture, and indigenous technology.

In May of 1985 an international symposium was held at The Metropolitan Museum of Art in honor of John M Crawford Jr whose gifts of Chinese calligraphy and painting have constituted a significant addition to the Museum's holdings. Over a three-day period senior scholars from China, Japan, Taiwan, Europe, and the United States expressed a wide range of perspectives on an issue central to the history of Chinese visual aesthetics: the relationships between poetry, calligraphy, and painting. The practice of integrating the three art forms known as *san chieh* or the three perfections in one work of art emerged during the Sung and Yuan dynasties, largely in the context of literati culture, and it has stimulated lively critical discussion ever since. This publication contains twenty-three essays based on the papers presented at the Crawford symposium. Grouped by subject matter in a roughly chronological order, these essays reflect research on topics spanning two millennia of Chinese history. The result is an interdisciplinary exploration of the complex set of relationships between words and images by art historians, literary historians, and scholars of calligraphy. Their findings provide us with a new level of understanding of this rich and complicated subject and suggest further directions for the study of Chinese art history. The essays are accompanied by 255 illustrations, some of which reproduce works rarely published. Chinese characters have been provided throughout the text for artists' names, terms, titles of works of art, and literature, and important historical figures, as well as for excerpts of selected poetry and prose. A chronology also containing Chinese characters and an extensive index contribute to making this book illuminating and invaluable to both the specialist and the layman.

line painting a unique painting genre in fourteenth century China This genre relies on tools such as rulers to represent architectural details and structures accurately Such technical consideration and mechanical perfection linked this painting category with the builder's art which led to Chinese elites belittlement and won Mongol patrons admiration Yu suggests that painters in the Yuan dynasty made new efforts towards a unique modular system and an unsurpassable plain drawing tradition She argues that these two strategies made architectural paintings in the Yuan dynasty entirely different from their predecessors as well as making the art form extremely difficult for subsequent painters to imitate Architecture has been a subject of Chinese painting for two millennia but has remained elusive Painting Architecture explains the reasons as well as why the thirteenth and fourteenth centuries are pivotal The book also translates the vast writings on architectural painting places the paintings in historical context and assesses the relation between the paintings and actual buildings The superior scholarship and original interpretation ensure that paintings of architecture will be part of future discourse about Chinese painting Nancy Steinhardt professor University of Pennsylvania Focusing on the development of jiehua in the fourteenth century when the Mongols ruled China Yu's book raises issues beyond the field of painting history including architectural history aesthetics and social historical studies It is a long awaited contribution to a rarely studied painting genre and an admirable accomplishment of multidisciplinary research on Chinese art Qianshen Bai associate professor emeritus Boston University
