alkaloids sugars carotenoids fatty acids and so on It also includes data on compounds isolated from various classes of organisms such as lichens bacteria fungi are treated in special monographs The topics in this book are unlikely to be found in general chemistry courses The book covers the following topics of natural products cannabinoids toxic constituents from marine sources natural sweeteners generation of wines biological markers pheromones of insects and mammals pest management and secondary natural chemicals formed by microorganisms Among the authors of the reviews is Professor Raphael Mechoulam who received the Israel Prize for his work on active constituents cannabinoids of the Cannabis plant and Professor Douglas Kinghorn from University of Chicago who is the chief editor of Journal of Natural Products
