Needy Media Stephen Monteiro,2025-09-16 What makes our portable networked personal media devices smartphones tablets smartwatches so irresistible Reacting to our touch voice or gaze seizing and keeping our attention with sounds vibrations and screen prompts these objects construct an animated intimacy that builds trust and emotional dependence **Needy Media** explores how features such as face recognition awareness sensors and touchscreens have developed and intersected tying them to key concepts of psychology language and the body

Surveying products and practices across a half century Stephen Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey Monteiro traces a symbiotic overreliance a neediness between users and devices fostered by personalized aspects of digital materiality The physical and emotional bonds that emerge he argues not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly intuitive and individualized Raising important questions about privacy and power Needy Media seeks answers in the complex and sensitive relationship between interface and body a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self

Exploring the Selfie Julia Eckel, Jens Ruchatz, Sabine Wirth, 2018-04-06 This volume explores the selfie not only as a specific photographic practice that is deeply rooted in digital culture but also how it is understood in relation to other media of self portrayal Unlike the public debate about the dangers of selfie narcissism this anthology discusses what the practice of taking and sharing selfies can tell us about media culture today can the selfie be critiqued as an image or rather as a social practice What are the technological conditions of this form of vernacular photography By gathering articles from the fields of media studies art history cultural studies visual studies philosophy sociology and ethnography this book provides a media archaeological perspective that highlights the relevance of the selfie as a stereotypical as well as creative practice of dealing with ourselves in relation to technology

The End of Ownership Aaron Perzanowski, Jason Schultz, 2018-03-16 An argument for retaining the notion of personal property in the products we buy in the digital marketplace If you buy a book at the bookstore you own it You can take it home scribble in the margins put in on the shelf lend it to a friend sell it at a garage sale But is the same thing true for the ebooks or other digital goods you buy Retailers and copyright holders argue that you don't own those purchases you merely license them That means your ebook vendor can delete the book from your device without warning or explanation as Amazon deleted Orwell's 1984 from the Kindles of surprised readers several years ago These readers thought they owned their copies of 1984 Until it turned out they didn't In *The End of Ownership* Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace and make an argument for the benefits of personal property Of course ebooks cloud storage streaming and other digital goods offer users convenience and flexibility But Perzanowski and Schultz warn consumers should be aware of the tradeoffs involving user constraints permanence and privacy The rights of private property are clear but few people manage to read their end user agreements Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits But most important it would affirm our sense of self direction and autonomy If we own our purchases we are free to make whatever lawful use of them we please Technology need not constrain our freedom it can also empower us
