mediante l'ausilio di esempi pratici come contabilizzare il costo del personale evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio soprattutto in presenza di eventi particolari come la malattia gli infortuni e così via e alle conseguenti ripercussioni in termini di imposizione fiscale. In virtù di questa considerazione al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina alle cui fondamenta soggiacciono i principi contabili si caratterizza per il gran numero di esempi che di fatto rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda volti a consentire un rapido approccio al lettore soprattutto in quelle situazioni di particolare urgenza come nel caso di dover calcolare il costo per esigenze di budget. Viene infine proposto un caso concreto di contabilizzazione del costo partendo dal cosiddetto cedolone vale a dire il riassunto avvenuto nel periodo di lavoro considerato.

Political Economy of Malaysia's Industrial Policy Firdausi Suffian, 2021-02-22. This book examines the national automotive policy in Malaysia to help readers gain an understanding of the country's industrial policy making processes. Addressing a gap in analysis of the political economy of the national automotive policy the research presented combines the new institutional theory and the developmental state approach to provide new insights into elite policymakers measures to shield domestic automotive enterprises from pro market reforms. The formation of the national car project marks a turning point for Malaysia's industrial development as a country which it envisions will lead to it becoming a major player in the global automotive market. However the domestic institutional factors embedded in ethno economic interests and patronage constrain national car makers limiting their potential to grow and instead causing a slowdown in the industry. Allowing readers to understand the background to Malaysia's heavy industrialisation programme and the birth of its national car projects this book critically discusses the significance of institutional context in policy outcomes and highlights how institutions and policies have impact.
