Rules in Patent Law Daniel Krauspenhaar, 2014-10-06 The primary purpose of a patent law system should be to enhance economic efficiency in particular by providing incentives for making inventions The conventional wisdom is that patents should therefore be strictly exclusive rights Moreover in practice patent owners are almost never forced to give up their right to exclude others and receive only a certain amount of remuneration with for instance compulsory licensing Other economically interesting patent law objectives however include the transfer and dissemination of knowledge Mechanisms exist by which the patent owner decides if he or she would prefer exclusive or non exclusive rights for instance the opportunity to declare the willingness to license and create patent pools But it is questionable whether these mechanisms are sufficient and efficient enough in view of the existence of patent trolls and other problems This work challenges the

conventional wisdom to a certain extent and makes proposals for improvements *EBOOK: Managing Organizational Change: A Multiple Perspectives Approach* Ian Palmer, Richard Dunford, Gib Akin, 2008-07-16 Managing Organizational Change provides managers with an awareness of the issues involved in managing change moving them beyond one best way approaches and providing them with access to multiple perspectives that they can draw upon in order to enhance their success in producing organizational change These multiple perspectives provide a theme for the text as well as a framework for the way each chapter outlines different options open to managers in helping them to identify in a reflective way the actions and choices open to them Changing organizations is as messy as it is exhilarating as frustrating as it is satisfying as muddling through and creative a process as it is a rational one This book recognizes these tensions for those involved in managing organizational change Rather than pretend that they do not exist it confronts them head on identifying why they are there how they can be managed and the limits they create for what the manager of organizational change can achieve
