- The U.S. Geological Survey (USGS) calls the Bakken shale foundation, stretching across 200,000 square miles, the largest continuous oil accumulation it has ever seen. Oil was first discovered there in 1951, but it hasn't been accessible until now.
- The oil rock is located between layers of Shale nearly two miles underground
- Considered a marginal resource just a few years ago, new technology transformed the area into prolific oil and gas producer
