physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years. Such knowledge among factors such as the historical context of mining, current coal mining flows and volumes of water technology used and processes followed, information and communication and vested interests influence social constructions of the water quality. What counts as the truth about water varies depending on the individual's perspective, their purpose and their individual interests. Further, how one defines water quality influences what treatment processes are preferred in order to improve water quality. The book explains why, for example, a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government's silo approach. The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit. The case presented in this book offers insights and recommendations for policymakers working in water governance, including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government.

Forging Solidarity Astrid von Kotze, Shirley Walters, 2017-04-13. Animating this book is a twofold question: In what ways are adult and popular educators responding to various harsh economic, political, cultural and environmental conditions? In doing so, are they planting seeds of hope for and imaginings of alternative futures which can connect individuals and communities locally and globally to achieve economic, ecological and social justice? The book illustrates how transformative politics of solidarity often involve actors across vastly different backgrounds. Solidarity is therefore a political relationship that is forged through particular struggles situated in place and time across power differentials. The authors put popular education to work by describing and analysing their strategies and approaches. They do so using accessible language and engaging styles. Popular education is a medium for dreaming, for imagining other futures. It is also essential for countering the wilful spreading of fake news and propagation of ignorance. Pedagogies of solidarity are necessary to building connections amongst people at a time when competitive individualism and alienation are rampant. Forging solidarity with and amongst communities is a means towards that end and indeed an end in itself. Corporate mines and agribusiness poison the water we drink, the air we breathe and the food we eat. Together with their political proxies, they destroy the earth and her peoples too many are killed because of their military, economic, religious and information wars. How do we stand up for ourselves and the earth that nourishes us against this global system? *Forging Solidarity* shares inspiring stories that feed our deep connection and power. Pregs Govender, Author of *Love and Courage: A Story of Insubordination*. *Forging Solidarity* is a critical and timely collective intervention that ponders, prods, pokes and plays in the most generative ways. In so doing, it invites us to continue deepening our engagements with questions of responsibility and justice in relation to education everywhere. Richa Nagar, author of *Muddying the Waters: Co-authoring Feminisms across Scholarship and Activism*. This book inspires people to realize that not fighting against socio-economic injustices is to side with oppressors. Ntombi Nyathi, Programme Director of Training.

Non-Western Identity Byron G. Adams, Fons J. R. van de Vijver, 2022-02-02 Identity is a construct strongly rooted and still predominantly studied in Western or WEIRD Western educated industrialized rich and democratic contexts e.g. North American and Western European. Only recently has there been more of a conscious effort to study identity in non-Western or non-WEIRD contexts. This edited volume investigates identity from primarily a non-Western perspective by studying non-Western contexts and non-Western minority or immigrant groups living in Western contexts. The contributions examine different aspects of identity e.g. personal identity, social identity, online identity as either independent or interrelated constructs, b) consider the associations of these constructs with aspects of intergroup relations, acculturative processes and/or psychological well-being, c) document the advancement in research on identity in underrepresented groups, contexts and regions such as Africa, Asia, Eastern Europe, the Middle East and South America, and d) evaluate different approaches to the study of identity and the implications thereof. This book is intended for cultural or cross-cultural academics, practitioners, educators, social workers, postgraduate students, undergraduate students and scholars interested in studying identity. It provides insight into how identity in non-Western groups and contexts may both be informed by and may inform Western theoretical perspectives. **ECMLG 2017 13th European Conference on Management, Leadership and Governance**

Martin Rich, 2017-12-11 These Proceedings represent the work of contributors to the 13th European Conference on Management, Leadership and Governance. ECMLG 2017 hosted this year by the Cass Business School, City University of London on 11-12 December 2017. The Conference Chair is Dr Martin Rich. The conference will be opened with a keynote address by Dr Helen Rothberg from Marist College, Poughkeepsie, USA with a speech entitled 'Everything I Know about Leadership I Learned as a Bartender'. On the second day the keynote will be delivered by Dr Amanda Goodall from City University of London on the topic of 'Why we need core business experts as leaders'. ECMLG is a well-established platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of Management, Leadership and Governance. At the same time it provides an important opportunity for members of the community to come together with peers, share knowledge and exchange ideas. With an initial submission of 160 abstracts, after the double-blind peer review process, there are 61 academic papers, 8 PhD Papers and 2 Work in Progress papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Finland, Germany, Hungary, Iran, Ireland, Israel, Kazakhstan, Kenya, Lithuania, Malaysia. **Ecological Informatics** Friedrich Recknagel, William K. Michener, 2017-09-21

This book introduces readers to ecological informatics as an emerging discipline that takes into account the data-intensive nature of ecology, the valuable information to be found in ecological data and the need to communicate results and inform decisions including those related to research, conservation and resource management. At its core, ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research.

and the dissemination of results to scientists and the public Its conceptual framework links ecological entities genomes organisms populations communities ecosystems landscapes with data management analysis and synthesis and communicates new findings to inform decisions by following the course of a loop In comparison to the 2nd edition published in 2006 the 3rd edition of Ecological Informatics has been completely restructured on the basis of the generic conceptual framework provided in Figure 1 It reflects the significant advances in data management analysis and synthesis that have been made over the past 10 years including new remote and in situ sensing techniques the emergence of ecological and environmental observatories novel evolutionary computations for knowledge discovery and forecasting and new approaches to communicating results and informing decisions
