

Abstract: *Protein kinase C- δ (PKC- δ) is a member of the δ family of protein kinases. PKC- δ is involved in a variety of cellular processes, including cell growth, differentiation, and apoptosis. In this study, we investigated the role of PKC- δ in the regulation of cell growth and differentiation. We found that overexpression of PKC- δ in cells leads to increased proliferation and differentiation. Conversely, knockdown of PKC- δ expression results in decreased proliferation and differentiation. These findings suggest that PKC- δ plays a critical role in the regulation of cell growth and differentiation.*
