A. Reed, Rob Amery, Eric Bouvet, Kayoko Enomoto, Hui Ling Xu, 2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system predominantly in Australia but touching other universities worldwide Related studies on language planning methodology or pedagogy have focused on one or more of these same issues but rarely on their totality Intersections as a metaphor running discreetly through the essays in this volume connects them all to a lived reality The field of languages and cultures as it is

practised and reflected upon in Australian universities is essentially an interdisciplinary and interconnecting space one in which linguistic and disciplinary diversities meet and join forces rather than collide or disperse along different pathways The international and local studies featured here focus on language planning new pedagogies and language reclamation and link to meeting points and commonalities They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field whether within their institutions within the tertiary system or within the framework of government policy

Advancing Language Research through Q Methodology Nicola Fraschini, Adrian Lundberg, Renata Aliani, 2024-07-16 This volume investigates the ways in which Q

methodology can uncover and foreground new perspectives and contribute to language education and language policy research. It demonstrates the flexibility of this research methodology in addressing dynamic and complex language issues across a variety of educational topics and geographical contexts. The chapter authors use Q methodology to explore topics such as identity, motivation, cognition, emotion, pre-service and in-service teacher beliefs, and to evaluate language programmes, curricula and policies. These contributions highlight Q methodology's potential to inform theoretical developments by revealing fresh perspectives on contemporary issues and generating new hypotheses. They foster further Q methodology research demonstrating how it can contribute to a science of subjectivity and allow researchers to value the perspectives of all stakeholders for more inclusive research. This book will be of interest to graduate students and researchers in language education and language policy research and those in the broader field of social sciences looking to expand their knowledge of the methodology and how it can be used to study contemporary dynamic and complex issues.
