

## UNIT 1 Ecology Study Guide- Stability & Change in Living Systems

### Summative Assessment- October 1<sup>st</sup>-2<sup>nd</sup>, 2020

**5714. Obtain, evaluate, and communicate information to examine the interdependence of organisms with one another and their environments.**

a. Construct an explanation for the patterns of interactions observed in different ecosystems in terms of the relationships among and between organisms and abiotic components of the ecosystem.

c. Analyze and interpret data to provide evidence for how resource availability, disease, climate, and human activity affect individual organisms, populations, communities, and ecosystems.

**UNIT VOCABULARY** to be familiar with (Use the [poster](#) to study these.)

ecology    species    habitat    population    organism    community    ecosystem    biome  
biosphere    biotic factor    abiotic factor    predator    prey    limiting factor    carrying capacity

|                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. An organism's environment is made up of which two types of factors? (living and nonliving) | Biotic (the living parts of an ecosystem) and Abiotic (the nonliving parts of an ecosystem).                                                                                                                                                                                                                                                                                                                                                                                                    |
| 2. What are some examples of <b>abiotic factors</b> that can affect an organism?              | These include water, sunlight, air, temperature and soil                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3. What are the levels of organization within the environment from simplest to most complex?  | Organism, population, community, ecosystem, biome, biosphere                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 4. How does each level differ from each other? Define each level & give examples.             | Organism- one individual of a particular species (wolf)<br>Population- two or more of the same species living in the same area (wolves in a pack)<br>Community- several populations of organisms living in the same area (wolves, rabbits, insects, rodents, grass, trees, flowers, bushes)<br>Ecosystem- the community and all the abiotic factors (the area of forest including the community of organisms, a river, rocks, & soil)<br>Biome- large geographic area characterized by types of |
