**Archaeology of Southern Africa** Peter Mitchell, 2024-06-06 Some of humanity's earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and farmer communities alike New work on pre colonial states contests models that previously explained

their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself. Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide. In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years.

Global Africa Dorothy Hodgson, Judith Ann-Marie Byfield, 2017-08

Global Africa will complicate conventional views of Africa as a place of violence, despair and victimhood, a place and space that other people, states and organizations act on and steal from. Instead they aim to document some of the significant global connections, circulations and contributions that African people, ideas and goods have made in the world, not just in the United States but in South Asia, Latin America, Europe and elsewhere. They will showcase new framings of Africa but will not romanticize the conditions and circumstances in which too many people on the continent currently live. The essays in this volume will amplify those voices that offer complex and insightful explanations, strategies for solutions and inspiration for the future. Provided by publisher

**Organise or Die?** Raphaël Botiveau, 2017-12-01

The story of one of the leading trade unions in South Africa, the National Union of Mineworkers, and its role in the struggle against white minority rule. *Organise or Die: Democracy and Leadership in South Africa's National Union of Mineworkers* NUM is the first in-depth study of one of the leading trade unions in the country. Founded in 1982, the trade union played a key role in the struggle against white minority rule before turning into a central protagonist of the ruling Tripartite Alliance after apartheid. Deftly navigating through workerist social movement and political terrains that shape the South African labour landscape, this book sheds light on the path that led to the unprecedented 2012 Marikana massacre, the dissolution of the Congress of South African Trade Unions (Cosatu) federation and to fractures within the African National Congress (ANC) itself. Working with the notions of organisational agency and strategic bureaucratisation, Raphaël Botiveau shows how the founding leadership of NUM built their union's structures with a view to mirror those of the multinational mining companies NUM faced. Good leadership proved key to the union's success in recruiting and uniting mineworkers, and NUM became an impressive school for union and political cadres, producing a number of South Africa's top post-apartheid leaders. An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down. Botiveau provides a compelling narrative of NUM's powerful history and the legacy of its leadership. It will appeal to a broad readership including journalists, students and social sciences scholars interested in South Africa's contemporary politics and labour history.

have wrestled with the meaning of this painting theme in San cosmology without reaching consensus or a plausible explanation Drawing on San ethnography published over the past 150 years Mguni argues that formlings are in fact representations of flying termites and their underground nests and are associated with botanical subjects and a range of larger animals considered by the San to have great power and spiritual significance This book fills a gap in rock art studies around the interpretation and meaning of formlings It offers an innovative methodological approach for understanding subject matter in San rock art that is not easily recognisable and will be an invaluable reference book to students and scholars in rock art studies and archaeology

**Between Crime and War** Claire Oakes Finkelstein,Jens David Ohlin,Christopher J. Fuller,Mitt Regan,2023 The threat posed by the recent rise of transnational non state armed groups does not fit easily within either of the two basic paradigms for state responses to violence The civilian paradigm focuses on the interception of demonstrable immediate threats to the safety of others The military paradigm focuses on threats posed by collective actors who pose a danger to the state s ability to maintain basic

social order and at times the state The book suggests that we need not see the options as confined to this binary choice as it evaluates the philosophical and ethical implications of using both military and non military frameworks for pursuing counterterrorism operations      **Travels in the Interior of Southern Africa** William John Burchell, 2015-07-02 A celebrated two volume geography and ethnography of southern Africa in 1811 15 by a British botanist originally published 1822 4
