Prospectus of the Faculty of Technology University of Manchester Institute of Science and Technology,1909 *The Impact of Technology on Faculty Development, Life, and Work* Kay Herr Gillespie,1998 A critical and global issue in higher education today is the implementation of technology in our individual institutional and collective settings for the enhancement of teaching and learning in the widest sense The scope of the issue is inclusive not only of undergraduate and graduate teaching and learning within the classroom and beyond but also of the research and service or outreach components of our mission in short of everything we do in higher education The foundation assumptions for this exploration of issues relating to the impact of technology are that 1 technology faculty members lives and work and faculty development

are inextricably bound together 2 learning by doing is effective learning 3 the rapidity of technological change and its importance for education will neither diminish nor disappear and 4 it is imperative for us to reflect and then to act in increasingly vigorous ways on the possibilities and realities of technological change We can do so positively and with enthusiasm about improving the quality of all that we have been seeking to do for centuries structuring ever more effectively the formalized education and subsequent enlightenment of those who come after us and of ourselves in the process These thoughts are offered as an invitation to readers to reflect to affirm or redefine thoughts still forming and finally to act in the effort we are all making to incorporate exciting new technological capabilities into our changing world of higher education This is the 76th issue of the quarterly journal *New Directions for Teaching and Learning* **Teaching Faculty how to Use Technology** Rhonda Epper, Tony Bates, 2001 The case studies and analysis in this book address the ways in which higher education institutions are responding to the growing demand for faculty support in the use of instructional technology The stories of several institutions deep in the trenches of faculty development programs are examined with an eye not just to their successes but also to their missteps and how they have overcome the biggest challenges to helping faculty integrate technology into teaching book jacket A Note on Technology in Universities Great Britain.
